English Test Papers For Standard 4 In Mauritius:

Language, Literacy and Learning in Primary Schools Olatunde A. Adekola, 2007 Language Literacy and Learning in Primary Schools is a synthesis of the findings arising from four years of policy research and development in Nigeria's primary schools that focused on the gap between what teachers should know and be able to do and the realities of teaching and learning in classrooms. It begins by critically examining the outcomes of primary schooling as measured by learning achievement results from national assessments and by identifying some core learning problems for Nigerian primary school children. It reviews the findings from recent research reports that studied teaching and learning processes in primary school classrooms and it identifies the pedagogical issues in primary classrooms that contribute to poor learning achievements. This report describes a research and development program that set out to improve teaching and learning in core learning skill areas of the curriculum. This study identifies priority areas for teachers' professional development. It suggests a policy framework for the continuing professional development of primary school teachers including the initial preparation of teachers and their induction into teaching. It proposes medium and long term strategies to bring about the desired changes in teaching and learning through school-based approaches to teacher development.
