Raven's 8th edition of *Environment* offers more detailed content than the Visualizing text for a better understanding and integration of the core environmental systems and to view and analyze the role those systems play. Shorter but still comprehensive coverage focuses on ethical decision making and key local environmental science issues requiring readers to think critically about the course material outside of the classroom. Other features include brief text in the comprehensive segment, extensive chapter pedagogy to help reinforce the systems approach, more opportunities to think critically about the how systems intersect and fit together, and new data interpretation questions at the end of each chapter. **The Environment** Karen D. Today we face some of the greatest environmental challenges in global history. Understanding the damage being done and the varied ethics and efforts contributing to its repair is of vital importance. This volume poses the question: What can increasing the emphasis on the environment in environmental anthropology along with the science of its problems and the theoretical and methodological tools of anthropological practice do to aid conservation efforts, policy initiatives, and our overall understanding of how to survive as citizens of the planet? *Environmental Anthropology Today* combines a range of new ethnographic work with chapters exploring key theoretical and methodological issues and draws on disciplines such as sociology and environmental science as well as anthropology to illuminate those issues. The case studies include work on North America, Europe, India, Africa, Asia, and South America, offering the reader a stimulating and thoughtful survey of the
