Environmental Ethics Concepts Policy And Theory:

Environmental Ethics Joseph R. DesJardins, 1999 Publisher Description **Environmental Ethics, Ecological Theology, and Natural Selection** Lisa Sideris, 2003-07-16 In the last few decades religious and secular thinkers have tackled the world's escalating environmental crisis by attempting to develop an ecological ethic that is both scientifically accurate and free of human-centered preconceptions. This groundbreaking study shows that many of these environmental ethicists continue to model their positions on romantic pre-Darwinian concepts that disregard the predatory and cruelly competitive realities of the natural world. Examining the work of such influential thinkers as James Gustafson, Sallie McFague, Rosemary Radford Ruether, John Cobb, Peter Singer, and Holmes Rolston, Sideris proposes a more realistic ethic that combines evolutionary theory with theological insight, advocates a minimally interventionist stance toward nature, and values the processes over the products of the natural world.

Nature Ethics Marti Kheel, 2008 In *Nature Ethics: An Ecofeminist Perspective*, Marti Kheel explores the underlying worldview of nature ethics, offering an alternative ecofeminist approach. Seeking to heal the divisions between the seemingly disparate movements and philosophies of feminism, animal advocacy, environmental ethics, and holistic health, Kheel proposes an ecofeminist philosophy that underscores the importance of empathy and care for individual beings as well as larger wholes.

Handbook of Global Environmental Politics Peter Dauvergne, 2012-01-01 The second edition of this Handbook contains more than 30 new and original articles as well as six essential updates by leading scholars of global environmental politics. This landmark book maps the latest theoretical and empirical research in this energetic and growing field. Captured here are the pioneering and lively debates over concerns for the health of the planet and how they might best be addressed. The introduction explores the intellectual trends and evolving parameters in the field of global environmental politics. It makes a case for an expansive definition of the field, one that embraces an interdisciplinary literature on the connections between global politics and environmental change. The remaining chapters are divided into four broad themes: states and cooperation, global governance, the political economy of governance, and knowledge and ethics, with each section covering key emerging issues. In-depth explorations are given to topics such as climate change, multinational corporations, international agreements, and UN organizations, regulations, and business standards, trade, and international finance, multilevel and transnational governance, and ecological citizenship. *Handbook of Global Environmental Politics, Second Edition* is a comprehensive review of the field and offers cutting-edge ideas for further research. As such, scholars, students, and policymakers will find themselves looking to it for many years to come.

Ethics and Environmental Policy Frederick Ferré, Peter Hartel, 1994 In this collection of essays, leading environmentalists and philosophers explore the relationship between environmental ethics and policy, both in theory and practice. The first section of the book focuses on four approaches to change in ethical theory: ecological science, feminist metaphysics, Chinese philosophy, and holistic postmodern technology. In subsequent sections, the contributors emphasize the need for

nontraditional solutions and attempt to expand awareness of the most pressing practical problems Among the topics discussed are the possibilities of real international cooperation the inequitable but economically intractable issue of global gasses the political and ethical challenges of city planning and the growing evidence of fundamental inappropriateness in treating land as legal private property This volume is based on essays presented in 1992 at the Second International Conference on Ethics and Environmental Policy The conference was held in response to the increasing need for a new ethics that would counter the traditional human centered dominantly individualistic approach of the industrial world toward the environment

Eco-Phenomenology Charles S. Brown, Ted Toadvine, 2012-02-01 This groundbreaking collection explores the intersection of phenomenology with environmental philosophy It examines the relevance of Husserl Heidegger Merleau Ponty and Levinas for thinking through the philosophical dilemmas raised by environmental issues and then proposes new phenomenological approaches to the natural world The contributors demonstrate phenomenology's need to engage in an ecological self evaluation and to root out anthropomorphic assumptions embedded in its own methodology Calling for a reexamination of beliefs central to the Western philosophical tradition this book shifts previously marginalized environmental concerns to the forefront and blazes a trail for a new collaboration between phenomenologists and ecologically minded theorists

Environmental Ethics Joseph R. DesJardins, 2000 The text serves as an introduction to ethical theory as it applies to environmental issues and as a casebook on contemporary problems of science industry and individual decision making It provides a readable yet philosophically careful survey of the field of environmental ethics It is comprehensive covering topics from the relevance of Aristotle's ethics for environmental issues to Deep Ecology and Ecofeminism

Environmental Ethics David R. Keller, 2010-03-15 Through a series of multidisciplinary readings *Environmental Ethics: The Big Questions* contextualizes environmental ethics within the history of Western intellectual tradition and traces the development of theory since the 1970s Includes an extended introduction that provides an historical and thematic introduction to the field of environmental ethics Features a selection of brief original essays on why to study environmental ethics by leaders in the field Contextualizes environmental ethics within the history of the Western intellectual tradition by exploring anthropocentric human centered and nonanthropocentric precedents Offers an interdisciplinary approach to the field by featuring seminal work from eminent philosophers biologists ecologists historians economists sociologists anthropologists nature writers business writers and others Designed to be used with a web site which contains a continuously updated archive of case studies [environmentalethics info](#)

On Civic Friendship Sibyl A. Schwarzenbach,2009-08-22 Women have performed the vast majority of often unpaid friendship labor for centuries Embodying the freedom equality and ideals of the Constitution civic friendship emerges as a necessary condition for genuine justice Through a critical examination of social and political relationships from ancient times to today Sibyl Schwarzenbach develops a truly innovative feminist theory of the democratic state Beginning with an analysis of Aristotle s notion of political friendship Schwarzenbach brings the philosopher s insights to bear on the social and political

requirements of the modern state She elaborates a conception of civic friendship that with its ethical reproductive praxis functions differently from male centered notions of fraternity and with its female participants remains fundamentally separate from generalized male inflected claims of Marxist solidarity Schwarzenbach also distinguishes civic friendship from feminist calls for public care arguing that friendship unlike care not only is reciprocal but also seeks to establish and maintain equality Schwarzenbach concludes with various public institutions economic legal and social that can promote civic friendship without sacrificing crucial liberties In fact women s entrance into the public sphere en masse makes such ideals realistic within a competitive individualistic society
