**Falling Upwards** Richard Holmes, 2013-10-29 Kirkus Best Books of the Year 2013 Time Magazine 10 Top Nonfiction Books of 2013 The New Republic Best Books of 2013 In this heart lifting chronicle Richard Holmes author of the best selling *The Age of Wonder* follows the pioneer generation of balloon aeronauts the daring and enigmatic men and women who risked their lives to take to the air or fall into the sky Why they did it what their contemporaries thought of them and how their flights revealed the secrets of our planet is a compelling adventure that only Holmes could tell His accounts of the early Anglo French balloon rivalries the crazy firework flights of the beautiful Sophie Blanchard the long distance voyages of the American entrepreneur John Wise and French photographer Felix Nadar are dramatic and exhilarating Holmes documents as well the balloons used to observe the horrors of modern battle during the Civil War including a flight taken by George Armstrong Custer the legendary tale of at least sixty seven manned balloons that escaped from Paris the first successful civilian airlift in history during the Prussian siege of 1870 71 the high altitude exploits of James Glaisher who rose seven miles above the earth without oxygen helping to establish the new science of meteorology and how Mary Shelley Edgar Allan Poe and Jules Verne felt the imaginative impact of flight and allowed it to soar in their work A seamless fusion of history art science biography and the metaphysics of flights *Falling Upwards* explores the interplay between technology and imagination And through the strange allure of these great balloonists it offers a masterly portrait of human endeavor recklessness and vision With 24 pages of color illustrations and black and white illustrations throughout

**French Discovery in an Age of Revolution** Jim Libby, 2023-07-24 The chaos of the French Revolution was quickly followed by the somewhat less chaotic rule of Napoleon Bonaparte For roughly 25 years France saw five constitutions countless warring political factions governments that included a monarchy a republic and an empire and almost constant warfare with most of Europe At the same time the French fought from within sending thousands of its own people to the guillotine And yet there were perhaps more advancements during that time than any other in world history Two brothers launched hot air balloons inaugurating the age of flight more than 100 years before Orville and Wilbur Wright Modern chemistry was developed eclipsing the strange and superstitious field of alchemy which preceded it The metric system was created Napoleon Bonaparte's army explored Egypt for three years and a French man would later translate the mysterious hieroglyphs This book details these French advances and more including the first photograph the first automobile and development of the process that spawned computer programming

**Falling Upwards** Richard Holmes, 2014-09-09 Time Magazine 10 Top Nonfiction Books of 2013 The New Republic Best Books of 2013 Kirkus Best Books of the Year 2013 In a dazzling fusion of history art science and biography *Falling Upwards* resurrects the daring men and women who first risked their lives to take to the air in balloons Richard Holmes gives us another of his unforgettable portraits of human endeavor recklessness and vision weaving together exhilarating accounts of early balloon rivalries pioneering ascents over Victorian cities and astonishing long distance voyages

The terrifying high altitude flights of James Glaisher helped to establish the science of meteorology as well as the notion of a fragile planet while balloons were also used to observe the horrors of modern battle during the American Civil War Here too are the many writers Mary Shelley Edgar Allan Poe Charles Dickens Jules Verne and more who felt the imaginative impact of flight and allowed it to soar in their work Holmes tells the history of ballooning from every angle scientific to poetic through the adventurers and entrepreneurs scientists and escapists heroes and fools who were possessed by the longing to be airborne With 24 pages of color illustrations and black and white illustrations throughout

### **Our Biggest Experiment**

Alice Bell,2021-09-21 Traversing science politics and technology Our Biggest Experiment shines a spotlight on the little known scientists who sounded the alarm to reveal the history behind the defining story of our age the climate crisis Our understanding of the Earth s fluctuating environment is an extraordinary story of human perception and scientific endeavor It also began much earlier than we might think In Our Biggest Experiment Alice Bell takes us back to climate change science s earliest steps in the eighteenth and nineteenth centuries through the point when concern started to rise in the 1950s and right up to today where the debate is over and the world is finally starting to face up to the reality that things are going to get a lot hotter a lot drier in some places and a lot wetter in others with catastrophic consequences for most of Earth s biomes Our Biggest Experiment recounts how the world became addicted to fossil fuels how we discovered that electricity could be a savior and how renewable energy is far from a twentieth century discovery Bell cuts through complicated jargon and jumbles of numbers to show how we re getting to grips with what is now the defining issue of our time The message she relays is ultimately hopeful harnessing the ingenuity and intelligence that has driven the history of climate change research can result in a more sustainable and bearable future for humanity

**Early Modern Spectatorship** Ronald Huebert,David McNeil,2019-06-30 What did it mean to be a spectator during the lifetime of Shakespeare or of Aphra Behn In Early Modern Spectatorship contributors use the idea of spectatorship to reinterpret canonical early modern texts and bring visibility to relatively unknown works While many early modern spectacles were designed to influence those who watched the very presence of spectators and their behaviour could alter the conduct and the meaning of the event itself In the case of public executions for example audiences could both observe and be observed by the executioner and the condemned Drawing on work in the digital humanities and theories of cultural spectacle these essays discuss subjects as various as the death of Desdemona in Othello John Donne s religious orientation Ned Ward s descriptions of London and Louis Laguerre s murals painted for the residences of English aristocrats A lucid exploration of subtle questions Early Modern Spectatorship identifies imagines and describes the spectator s experience in early modern culture

**Food and Aviation in the Twentieth Century** Bryce Evans,2020-12-10 Established by New York stockbroker Juan Trippe in 1927 the story of Pan Am is the story of US led globalisation and imperial expansion in the twentieth century

with the airline achieving the vast majority of firsts in aviation history pioneering transoceanic travel and new technologies and all but creating the glitz style and ambience eulogised in Frank Sinatra's *Come Fly with Me* Bryce Evans investigates an aspect of the airline service that was central to the company's success its food a gourmet glamour underpinned by both serious science and attention to the detail of fine dining culture Modelled on the elite dining experience of the great ocean liners the first transatlantic and transpacific flights featured formal thirteen course dinners served in art deco cabins and served by waiters in white waist length jackets and garrison hats As flight times got faster and altitudes higher Pan Am pioneered the design of hot food galleys and commissioned research into how altitude and pressure affected taste buds amending menus accordingly A tale of collaboration with chefs from the best Parisian restaurants and the wining and dining of politicians and film stars the book also documents what food service was like for flight attendants exploring how the golden age of airline dining was underpinned by a racist and sexist culture Written accessibly and with an eye for the glamour and razzamatazz of public aviation history Bryce Evans research into Pan Am airways will be valuable for scholars of food studies and aviation consumer tourism transport and 20th century American history

**Global Lawmaking and Social Change** Gregor Novak, 2024-12-12 Customary international law is a widely recognised modality of international lawmaking It underpins all norms of international law and shapes all aspects of global society Yet familiar approaches to customary international law struggle to answer basic questions about its role operation and prospects Pursuing an interdisciplinary approach this book offers an alternative perspective on customary international law as a dynamic and multifaceted social phenomenon and idea It explores customary international lawmaking in different social contexts including the regulation of armed conflict the treatment of the other and the management of global environmental risks Focusing on the varieties of customary international law it identifies four types of customary international law norms and explores their roles and implications Critically revisiting a classic topic of international law the book provides a tool for understanding and shaping global lawmaking and social change in a rapidly changing international legal order

Patrick Ellis,2021-07-27 In 1900 Paris had no skyscrapers no tourist helicopters no drones Yet well before aviation made aerial views more accessible those who sought such vantages had countless options available to them They could take in the vista from an observation ride see a painting of the view from Notre Dame or overlook a miniature model city In Aeroscotics Patrick Ellis offers a history of the view from above written from below Richly illustrated and premised upon extensive archival work this interdisciplinary study reveals the forgotten media available to the public in the Balloon Era and after Ellis resurrects these neglected spectacles as

aeroscopes opening up new possibilities for the history of aerial vision      The Man With His Head in the Clouds Richard O. Smith, 2015-10-07 Hilarious enlightening and inspiring The Man with His Head in the Clouds is anything but ordinary Smith has artfully created a category defying juxtaposition of historical biography and autobiographical recovery story fun and accessible The Psychologist All human life is here served up with a light touch and keen sense of the ridiculous Dr Lucy Worsley Pure pleasure A brilliant blend of biography and self help and a bold book about ballooning The Man with His Head in the Clouds is nothing less than a trip Frances Wilson This is the story of how an uneducated Oxford pastry cook became the first Englishman to fly in a self built balloon powered by primitive and potentially lethal hydrogen Despite taking off in force 8 gales crashing into hills and plopping into the Irish Sea James Sadler became a rare pioneering aeronaut to survive such perilous ascents Good luck was not hereditary his son's balloon fatally collided with a chimney Sadler advanced the scientific evolution of lighter than air flight and took part in both of the famous races that so captivated the public in late eighteenth century Europe across the Channel and the Irish Sea He earned Lord Nelson's endorsement for improving the Royal Navy with applied science created one of the first perhaps the very first mobile steam engines and was revered by fans like Percy Shelley and Dr Johnson Yet even the brightest stars one day collapse as Sadler's name emits virtually no light today Like Sadler Richard O Smith emanates from Oxford's Town not Gown Like Sadler he wants to look down on Oxford literally and his admiration for the balloonist culminates in him replicating the first ever flight also over Oxford But there is a problem The author suffers from acute acrophobia a crippling fear of heights This prevents him from standing on a stool yet alone dangling at 3 000 feet beneath an oversized party balloon To overcome his chronic height anxiety he seeks pre flight counselling learning all about current understanding of phobias and anxieties Here he discovers that he is also bathmophobic a fully functioning adult who is afraid of stairs Inspired by Sadler Smith sets out to overcome his debilitating fear and ascend in a balloon over Oxford Be positive You just need a will to do it counsels a psychologist So taking that advice he starts positively by making a will      **The Explorer Gene** Tom Cheshire, 2013-12-03 The remarkable account of an extraordinary family of explorers who spurred innovation and accomplished incredible feats even when the popular consensus was against them On May 27 1931 Auguste Piccard became the first human to enter the stratosphere flying an experimental balloon he invented himself Thirty years later his son Jacques went to the bottom of the earth descending to the Mariana Trench in a submarine built by him and Auguste To this day no one has gone deeper Bertrand the third generation was the first person to fly around the world non stop in a balloon Now he's building his own craft a solar powered plane to circumnavigate the globe In The Explorer Gene Tom Cheshire asks how three generations of one family achieved such extraordinary feats often with the consensus against them None of the Piccards set out to explore Auguste was a physicist Jacques an economist and Bertrand a psychiatrist Was it fate a famous family name or their explorer gene      **Science in Wonderland** Melanie Keene, 2015-03-26 In Victorian Britain an array of writers captured the excitement of new scientific discoveries and enticed

young readers and listeners into learning their secrets by converting introductory explanations into quirky charming and imaginative fairy tales forces could be fairies dinosaurs could be dragons and looking closely at a drop of water revealed a soup of monsters Science in Wonderland explores how these stories were presented and read Melanie Keene introduces and analyses a range of Victorian scientific fairy tales from nursery classics such as The Water Babies to the little known Wonderland of Evolution or the story of insect lecturer Fairy Know a Bit In exploring the ways in which authors and translators from Hans Christian Andersen and Edith Nesbit to the pseudonymous A L O E and Acheta Domestica reconciled the differing demands of factual accuracy and fantastical narratives Keene asks why the fairies and their tales were chosen as an appropriate new form for capturing and presenting scientific and technological knowledge to young audiences Such stories she argues were an important way in which authors and audiences criticised communicated and celebrated contemporary scientific ideas practices and objects

**A Book of Noises** Caspar Henderson, 2023-11-03 A Little Book of Noises gathers together sounds from the cosmos the natural world the human world and the invented world as well as containing pockets of silence From the vast sound of sand in the desert to the tuneful warble of a songbird from the meditative resonance of a temple bell to the improvisational melodies of jazz this is a celebration of all things auraculous or ear marvelous Sound shapes our world in invisible but significant ways and writer Caspar Henderson brings his characteristic curiosity and knowledge to the subject to take us on an exhilarating journey to examine noise related to humans anthropophony other life biophony our planet geophony and space cosmophony

**Navigating the Transnational in Modern American Literature and Culture** Tara Stubbs, Doug Haynes, 2017-03-16 This study develops the important work carried out on American literature through the frameworks of transnational transatlantic and trans local studies to ask what happens when these same aspects become intrinsic to the critical narrative Much cultural criticism since the 1990s has sought to displace perceptions of American exceptionalism with broader notions of Atlanticism transnationalism world system and trans localism as each has redefined the US and the world more generally This collection shows how the remapping of America in terms of global networks and as a set of particular localities or even glocalities now plays out in Americanist scholarship reflecting on the critical consequences of the spatial turn in American literary and cultural studies Spanning twentieth and twenty first century American poetry fiction memoir visual art publishing and television and locating the US in Caribbean African Asian European and other contexts this volume argues for a re modelling of American ness with the transnational as part of its innate rhetoric It includes discussions of travel migration disease media globalization and countless other examples of inflowing Essays focus on subjects tracing the contemporary contours of the transnational such as the role of the US in the rise of the global novel the impact of Caribbean history on American thought and vice versa transatlantic cultural and philosophical genealogies and correspondences and the exchanges between the poetics of American space and those of other world spaces Asking questions about the way the American eye has traversed and

consumed the objects and cultures of the world but how that world is resistant this volume will make an important contribution to American and Transatlantic literary studies **Cultural Techniques** Jörg Dünne, Kathrin Fehringer, Kristina Kuhn, Wolfgang Struck, 2020-08-24 This volume presents the preliminary results of the work carried out by the interdisciplinary cultural techniques research lab at the University of Erfurt Taking up an impulse from media studies its contributions examine from a variety of disciplinary perspectives the interplay between the formative processes of knowledge and action outlined within the conceptual framework of cultural techniques Case studies in the fields of history literary and media studies and the history of science reconstruct seemingly fundamental demarcations such as nature and culture the human and the nonhuman and materiality and the symbolical order as the result of concrete practices and operations These studies reveal that particularly basic operations of spatialization form the very conditions that determine emergence within any cultural order Ranging from manual and philological paper work to practices of opening up and closing off spaces and collective techniques of assembly these case studies replace the grand narratives of cultural history focusing on micrological examinations of specific constellations between human and nonhuman actors **Aerial Aftermaths** Caren Kaplan, 2017-12-21 From the first vistas provided by flight in balloons in the eighteenth century to the most recent sensing operations performed by military drones the history of aerial imagery has marked the transformation of how people perceived their world better understood their past and imagined their future In Aerial Aftermaths Caren Kaplan traces this cultural history showing how aerial views operate as a form of world making tied to the times and places of war Kaplan's investigation of the aerial arts of war painting photography and digital imaging range from England's surveys of Scotland following the defeat of the 1746 Jacobite rebellion and early twentieth century photographic mapping of Iraq to images taken in the immediate aftermath of 9 11 Throughout Kaplan foregrounds aerial imagery's importance to modern visual culture and its ability to enforce colonial power demonstrating both the destructive force and the potential for political connection that come with viewing from above **Women Who Fly** Serinity Young, 2018-01-02 From the beautiful apsaras of Hindu myth to the swan maidens of European fairy tales stories of flying women some carried by wings others by clouds rainbows floating scarves and flying horses reveal the perennial fascination with and ambivalence about female power and sexuality In Women Who Fly Serinity Young examines the motif of the flying woman as it appears in a wide variety of cultures and historical periods in legends myths rituals sacred narratives and artistic productions She considers supernatural women like the Valkyries of Norse legend who transport men to immortality winged deities like the Greek goddesses Iris and Nike figures of terror like the Furies witches and succubi airborne Christian mystics and wayward dangerous women like Lilith and Morgan le Fay Looking beyond the supernatural Young examines the modern mythology surrounding twentieth century female aviators like Amelia Earhart and Hanna Reitsch Throughout Young demonstrates that female power has always been inextricably linked with female sexuality and that the desire to control it is a pervasive theme in these stories This is vividly

depicted for example in the twelfth century *Nibelungenlied* in which the proud warrior queen Brunnhilde loses her great physical strength when she is tricked into surrendering her virginity. Even in the twentieth century the same idea is reflected in the exploits of the comic book and film character Wonder Woman who Young suggests retains her physical strength only because her love for fellow aviator Steve Trevor goes unrequited. The first book to systematically chronicle the figure of the flying woman in myth, literature, art and pop culture, *Women Who Fly* offers a fresh look at the ways in which women have both influenced and been understood by society and religious traditions throughout the ages and around the world.
