## **Conversations With A Scientist:**

**The Scientist's Conversations with the Teacher** Alexander Zelitchenko, 2001-08-23 The world is bigger than it seems Besides the world of things which is the coarsest there are more subtle worlds Just like the world of things the subtle worlds are material each one is formed by material of a particular subtlety Each part of the World is a triad Idea incarnated by a thing Thing Being that realizes the idea and makes the thing Triads form the World Hierarchy of ideas things beings Any triad develops What is subtle develops into what is coarse while what is coarse develops into what is subtle Each being works together with other beings Being has instruments bodies for working with materials of varying subtlety Man has three bodies a spiritual one a mental one and a physical one Man's task is to realize special human ideas This process culminates when one comes to spiritual awareness The development of man is a development of spiritual awareness Man needs to purify himself from time to time from the by products of the realization of ideas This purification is death Death turns man into another being but it does not stop development Man's fate provides him with the best conditions for working and developing

*Country Path Conversations* Martin Heidegger, 2010-06-14 The philosopher's meditations on nature technology and evil written in the final years of WWII presented in clear and highly readable translation Philosophy in Review First published in German in 1995 volume 77 of Heidegger's Complete Works consists of three imaginary conversations written as World War II was coming to an end Composed at a crucial moment in history and in Heidegger's own thinking these conversations present meditations on science and technology the devastation of nature World War II and the nature of evil Heidegger also delves into the possibility of release from representational thinking into a more authentic relation with being and the world The first conversation involves a scientist a scholar and a guide walking together on a country path the second takes place between a teacher and a tower warden and the third features a younger man and an older man in a prisoner of war camp in Russia where Heidegger's two sons were missing in action Unique because of their conversational style this lucid and precise translation of these texts offers insight into the issues that engaged Heidegger's wartime and postwar thinking

**Heidegger's Conversations** Katherine Davies, 2024-09-01 Reading Martin Heidegger's five conversational texts together for the first time Heidegger's Conversations elaborates not only what Heidegger thought but how he did so by attending to the philosophical possibilities of the genre of these understudied texts written between 1944 and 1954 Though he wrote little on the topic of teaching and learning explicitly Katherine Davies shows Heidegger performed an implicit poetic pedagogy in his conversations that remains to be recognized Heidegger launched an experimental attempt to enact a learning of non representational non metaphysical thinking by cultivating a distinctly collaborative sensitivity to the call of the poetic Davies illustrates how each conversation emphasizes a particular pedagogical element non oppositionality making mistakes thinking in community poetic interpretation and the dangers of such pedagogy which together constitute the developmental arc of these texts Whether Heidegger is revising or reinforcing his own earlier pedagogical practices Davies

argues that attending to the dramatic staging of the conversations offers a distinct vantage point from which to contend with Heidegger's philosophy and politics in the post war period

**A Scientist's Guide to Talking with the Media** Richard Hayes, Daniel Grossman, 2006 In *A Scientist's Guide to Talking with the Media* Richard Hayes and Daniel Grossman draw on their expertise in public relations and journalism to empower researchers in a variety of fields to spread their message on their own terms The authors provide tips on how to translate abstract concepts into concrete metaphors craft soundbites and prepare for interviews For those looking for a higher profile the authors explain how to become a reporter's trusted source the first card in the Rolodex on controversial issues

**Candid Science Vi: More Conversations With Famous Scientists** Istvan Hargittai, Magdolna Hargittai, 2006-10-23 *Candid Science VI* concludes the series by narrating the conversations with famous scientists from the biomedical sciences chemistry and physics There are 31 Nobel laureates and 11 other luminaries among them The scientists are in the field of biomedical sciences chemistry and physics a

*Conversations with a Scientist* Dr Stephen Benoit, Kimberly Soesbee, 2014-09-18 Does science have a place within Christianity If so what For one man when the scientific teaching he received in University clashed with the Christian faith instilled in him as a child he found the two were diametrically opposed and faith lost the battle And yet his soul longed for peace that he did not get in his scientific studies In these pages Dr Stephen Benoit discloses the inner battle he fought for 26 years as his soul sought peace The questions which rocked his belief system to the core haunted him as he explored other faiths engaged pastors and Christians in discussion and searched for reconciliation between science and God He joined with co author Kimberly Soesbee to help you see that faith and science can not only coexist but can bring you peace you may never have known before

**Women Scientists** Magdolna Hargittai, 2015-03-04 Magdolna Hargittai uses over fifteen years of in depth conversation with female physicists chemists biomedical researchers and other scientists to form cohesive ideas on the state of the modern female scientist The compilation based on sixty conversations examines unique challenges that women with serious scientific aspirations face In addition to addressing challenges and the unjustifiable underrepresentation of women at the higher levels of academia Hargittai takes a balanced approach by discussing how some of the most successful of these women have managed to obtain professional success and personal happiness *Women Scientists* portrays scientists from different backgrounds different geographical regions eighteen countries from four continents and leaders from a variety of professional backgrounds including eight Nobel laureate women The book is divided into three sections Husband and Wife Teams Women at the Top and In High Positions Hargittai uses her own experience to introduce her first section on the lives of prominent scientific couples and addresses the joys and disadvantages of husband and wife teams The second section is a comprehensive exploration of the struggles and triumphs of women at the top Hargittai introduces women from countries where relatively little has been written about female scientists The final section focuses on women scientists involved with science administration and leadership Hargittai's biographical sketches role models for budding scientists The

book is a much needed account of female presence and influence in the sciences      Mind, Life and Universe Lynn Margulis, Eduardo Punset, 2007-08-15 Nearly forty of the world's most esteemed scientists discuss the big questions that drive their illustrious careers Co editor Eduardo Punset one of Spain's most loved personages for his popularization of the sciences interviews an impressive collection of characters drawing out the seldom seen personalities of the world's most important men and women of science In *Mind Life and Universe* they describe in their own words the most important and fascinating aspects of their research Frank and often irreverent these interviews will keep even the most casual reader of science books rapt for hours Can brain science explain feelings of happiness and despair Is it true that chimpanzees are just like us when it comes to sexual innuendo Is there any hard evidence that life exists anywhere other than on the Earth Through Punset's skillful questioning readers will meet one scientist who is passionate about the genetic control of everything and another who spends her every waking hour making sure African ecosystems stay intact The men and women assembled here by Lynn Margulis and Eduardo Punset will provide a source of endless interest In captivating conversations with such science luminaries as Jane Goodall James E Lovelock Oliver Sachs and E O Wilson Punset reveals a hidden world of intellectual interests verve and humor Science enthusiasts and general readers alike will devour *Mind Life and Universe* breathless and enchanted by its truths      *Microphone In Hand: Interviews, Forewords, Reviews: Revelations From A Scientist And About A Scientist* Istvan Hargittai, 2025-05-05 This book offers a panoramic view of science through the perspective of Istvan Hargittai an internationally renowned Hungarian researcher and educator in physical chemistry He has had worldwide collaboration in molecular science symmetry studies and science history bridging East and West during these experiences He has talked with hundreds of luminaries of science and mathematics in physics chemistry biology medicine pharmacology and materials science among them one hundred Nobel laureates but here Hargittai himself was the interviewee in 23 conversations They have appeared in the print media radio and television in diverse international forums These conversations cut across political systems and geographical areas and reflect his scientific experience in European countries the United States and Russia spanning over 4 decades and his life experiences over 8 decades His scientific and writing output has included numerous books in structural chemistry symmetry the American and Soviet nuclear projects James D Watson Edward Teller emigration candid conversations with famous scientists 4 great cities of science the culture art and nature of scientific discovery the traits of scientific discoverers and the Nobel Prize Some of the greatest scientists of our time wrote forewords to his books and commented on his writings and other achievements Reviews of his books have appeared in *Nature Scientific American Physics Today Chemistry and Industry Lancet The Mathematical Intelligencer* and elsewhere This volume dips into all these aspects of a scientific life and career and offers education through entertainment for a broadest possible readership interested in what science is and what and how it does      **The Faithful Scientist** Christopher P. Scheitle, 2023-10-24 Reveals biases within scientific PhD training programs against emerging scientists who

embrace a religious faith and the ramifications for science Science is often viewed as antithetical to religion and it is true that scientists particularly those who work at universities are generally much less religious than the average American adult So what is it like to be a religious individual pursuing an advanced education and career in science Featuring engaging interviews and survey data from over 1 300 PhD students in the natural and social sciences The Faithful Scientist shows that the core challenge is not contending with contradictions between faith based beliefs and scientific knowledge Instead it is the bias budding scientific practitioners face from their colleagues if they are religious These dynamics are important for science as a field and ultimately for those who engage with or benefit from the results of scientific research There are real benefits to fostering diversity in science which may lead to more useful discoveries for populations who have generally not been the focus of research And women Black and Latina o people tend in general to be more religious than their white male peers meaning that diversifying the gender ethnic and racial composition of the scientific workforce likely requires diversifying the religious composition too This book offers vital empirical data that provide insight into what it means to support and foster religious diversity in science

**Reinventing The Future** Thomas A. Bass,1994 The author of The Eudaemonic Pie now reveals the inspiration motivations and aspirations of the world s greatest scientists The scientists interviewed in this collection have changed the rules of the game altered our perception of reality and the language used to describe it

Youths' Cogenerative Dialogues with Scientists Pei-Ling Hsu,2020-07-27 Working with scientists has been suggested as a powerful activity that can stimulate students interest and career aspirations in science However how to address challenges of power over issues and communication barriers in youth scientist partnerships In Youths Cogenerative Dialogues with Scientists the author describes a pioneering study to improve internship communications between youth and scientists through cogenerative dialogues The findings show that cogenerative dialogues can help youth and scientists recognize express and manage their challenges and emotions as they arise in their internships As a result cogenerative dialogues help youth and scientists work productively as a team and enhance their social boding Suggestions are also provided for science educators to design more innovative and effective projects for future youth scientist partnerships

*Scientific Writing in a Second Language* David Ian Hanauer,Karen Englander,2013-02-17 Scientific Writing in a Second Language investigates and aims to alleviate the barriers to the publication of scientific research articles experienced by scientists who use English as a second language David Ian Hanauer and Karen Englander provide a comprehensive meta synthesis of what is currently known about the phenomenon of second language scientific publication and the ways in which this issue has been addressed

Helping Scientists to Communicate Well for All Considered: Strategic Science Communication in an Age of Environmental and Health Crises Scott McWilliams,Marcia Allison,Marina Joubert,Ingrid Lofgren,Brianne Suldovsky,2022-09-16

*Being and Becoming Scientists Today* Susan A. Kirch,Michele Amoroso,2016-02-10 Can I contribute to science Do I like to work on the problems of science How do scientists know what they know Would I like to be

become a scientist These are questions that interest new science students The authors provide teachers with an approach to foster and answer these questions by concentrating on learners and learning They argue that students are typically taught from a disciplinary perspective of science Using this lens students are viewed as people who need to learn a particular canon of information methods and ways of knowing about the world a perspective that may be useful for practicing scientists but not ideal for young learners In this disciplinary approach to science education there is little room for development as a scientist In contrast the approach championed by Kirch and Amoroso places learner questions about the world at the forefront of teaching and learning and treats science as a system of human activity The historical explorations theoretical insights and practical advice presented here are appropriate for all ages and educational settings In *Being and Becoming Scientists* Today the authors provide new tools for thinking about science ideas for how to reveal the multiple stories of knowledge production to learners and approaches to teaching science as a collective process rather than a series of contributions made by famous individuals In these ways the authors promote the idea that all science learners contribute to the science in our lives

Candid Science V Balazs Hargittai,Istv n Hargittai,2005 *Candid Science V Conversations with Famous Scientists* contains 36 interviews with well known scientists including 19 Nobel laureates Wolf Prize winners and other luminaries These in depth conversations provide a glimpse into the greatest achievements in science during the past few decades featuring stories of the discoveries and showing the human drama behind them The greatest scientists are brought into close human proximity as if readers were having a conversation with them This volume departs from the previous ones in that it contains interviews with mathematicians in addition to physicists chemists and biomedical scientists Another peculiarity of this volume is that it includes nine interviews from another project the collection of the late Clarence Larson former Commissioner of the Atomic Energy Commission and his wife Jane Larson Tapes The 36 interviewees include famous personalities of our time such as Donald Coxeter John Conway Roger Penrose Alan Mackay Dan Shechtman Charles Townes Arthur Schawlow Leon Cooper Alexei Abrikosov Luis Alvarez William Pickering William Fowler Vera Rubin Neta Bahcall Rudolf Peierls Emilio Segre Harold Agnew Clarence Larson Nelson Leonard Princess Chulabhorn Linus Pauling Miklos Bodanszky Melvin Calvin Donald Huffman Alan MacDiarmid Alan Heeger Jens Christian Skou Paul Lauterbur Gunther Stent John Sulston Renato Dulbecco Baruch Blumberg Arvid Carlsson Oleh Hornykiewicz Paul Greengard and Eric Kandel
