Designing the Complex City Elena Porqueddu, 2025-08-08 How can designers address the emergent self organizing nature of complex urban environments

Designing the Complex City highlights how both an excess and a lack of design control might contrast the lively complexity of cities their adaptive and evolutionary capacity By using key concepts from systems thinking complexity sciences life sciences cognitive sciences and social sciences the book frames a systemic spatial design approach aimed at enhancing the potential of different spatial design disciplines to navigate place specific emergent transformations without overdetermining their formal outcome A range of heterogeneous case studies developing at different scales show how embracing a design approach that is embodied open ended contextually responsive incremental and adaptive does not question the relevance of designers specific skills in shaping the physical structure of cities it may rather increase their potential to effectively intervene in complex adaptive cycles of urban decay and self regeneration Designing the Complex City provides insights for students researchers and academics in architecture interior design urban and landscape design planning theory and urban studies It is essential reading for all designers who seek to proactively and meaningfully intervene in spontaneous socio spatial dynamics

Planning and Design for Future Informal Settlements David Gouverneur, 2014-08-13 This is the first book to address future informal settlements at the global scale It argues that to foster favourable conditions for the sustainable evolution of future informal cities planners must consider the same issues that are paramount in formal urban developments such as provision of balanced land uses energy efficiency and mobility water management and food sufficiency governance and community participation productivity and competitiveness identity and sense of place Planning and Design for Future Informal Settlements makes a call for responsible action to address the urban challenges of the developing world suggesting that the vitality of informality coupled with spatial design and good management can support the efficient use of resources in better places to live The book analyses the strengths and weaknesses of informal urbanism and the challenges faced by the fast growing cities of the developing world Through case studies it demonstrates the contributions and limitations of different attempts to plan ahead for urban growth from the creation of formal housing and urban infrastructures for self built dwellings to the improvement of existing informal settlements It provides a robust framework for planners and designers policy makers NGOs and local governments working to improve living conditions in developing cities

Architecture Form(s) Identity Greta Allegretti, Carola D'Ambros, Chiara Lionello, Enrico Miglietta, Valerio Maria Sorgini, Greta Maria Taronna, 2022-08-03 Architecture form s identity Spaces for the absence of memory is a collection of essays on the theme of memory its possible loss weakness ability to build individual and collective identities and on the way architecture inserts itself in this process determining different spaces of reflection These texts all arise from a common research ground which saw the editors personally involved in an inter doctoral Workshop The Memory as Construction of the Subject Designing for the Absence of Memory 2018 19 with a collaboration between Politecnico di Milano AUID and the Universidad de Sevilla HAC Ph D schools in which the theme of memory and the construction of a more holistic space that dialogues with it was at the center of the design reflection These contributions all built around that very rich relationship between memory and

architecture have led to a necessary desire to broaden the horizons and thematic limits reached by the workshop considering them as a starting point for the collection of different perspectives able to investigate some issues in a more specific way
