Rethinking Research Methods in an Age of Digital Journalism Michael Karlsson, Helle Sjøvaag, 2018-10-18 The digital infrastructure of media production dissemination and consumption is becoming increasingly complex presenting the challenge of how we should research the digital journalism environment Digital journalism takes many forms we therefore need to revise improve adjust and even invent methods to understand emerging forms of journalism In this book scholars at the forefront of methodological innovations in digital journalism research share their insights on how to collect process and analyse the diverse expressions of digital journalism including online news search results hyperlinks and social media posts As digital journalism content often comes in the form of big data many of these new approaches depart from the traditional methods used in media research in significant ways As we move towards new ways of understanding digital journalism the methods developed for such purposes also need to be grounded in scientific rigour This book aims to share some of the emerging processes by which these methods tools and approaches are designed implemented and validated As such this book not only constitutes a benchmark for thinking about research methods in digital journalism it also provides an entry point for graduate students and seasoned scholars aiming to do research on digital journalism This book was originally published as a special issue of *Digital Journalism* *The Micro-historian's Guide to Research, Evidence, & Conclusions* Reginald W. Bacon, 2019-09-18 *The Micro Historian's Guide to Research Evidence Conclusions* imparts useful guidance to motivated historians genealogists special interest researchers and local history enthusiasts As long buried sources become available via the internet more regular folks without a Ph D in history are joining the fun of information gathering and shining new light on under explored history yet often with no foundation of method The author answers the call with this volume paying forward the guidance received from long ago mentors as well as from present day historians and archivists Topics include research planning execution evaluation of evidence formulation of conclusions and the crafting of a summary narrative Each topic is enriched by practical examples from the author's experience The aim is to help the new practitioner build a foundation of research skills that leads to evidence based conclusions The author's perspective of experience as a disciplined researcher but also with roots as a no nonsense old school newspaper reporter occasionally prompts a mild tease of the buttoned down genealogy proof standard or conversely a deflating poke at flabby interpretation and moribund academic writing wherever it

may fester The Micro Historian s Guide to Research Evidence Conclusions draws theory from dozens of history genealogy historiography and research giants through the ages The book also pays tribute to that long ago cigar chomping newspaper editor who admonished a young reporter Yer mother sez she loves ya You still gotta check it out **The Everything**
