The Course Reflection Project Nicole Schonemann, Emily Metzgar, Andrew Libby, 2015-05-01 Service learning is entering a post initiatory phase At tertiary institutions of all types and sizes service learning programs are common and service learning requirements for graduation are growing in popularity Taken together alongside continued faculty interest in effective teaching these factors have raised the visibility and popularity of service learning Now the greater need in service learning is not to prove the need for or efficacy of service learning but to turn the focus squarely back on practice Following established best practice is not enough instructors also need to reflect on how this fits within the specific context and application of each unique course and service learning partnership While there are many excellent resources that detail best practice and showcase exemplary service learning courses faculty reflection and course revision often goes unmentioned In response to the lack of attention on the role of reflection and course revision we convened groups of faculty from a variety of disciplines to reflect deeply on their courses paying specific attention to obstacles and challenges These conversations were converted to articles for this edited collection each chapter representing the process of reflection and revision and serving as a guide to develop effective practice in varied curricular contexts This text contributes to the body of literature on service learning in a unique and practical manner Faculty teaching or interested in teaching service learning classes would benefit from this text as well as university administrators and community service directors involved in service learning at a programmatic and institutional level This book should be marketed to faculty teaching disciplinary service learning classes and service learning pedagogy classes and administrative offices involved in service learning This could be a supplementary text for graduate level pedagogy courses Higher education institutional libraries would benefit from this text as well as the national and state campus compact offices

Knowledge Michael W. Apple, 2014-03-26 This third edition of *Official Knowledge* the classic text from one of the world's most distinguished education scholars encourages educators once again to critically examine the relationship among knowledge, power, and education. Rather than simply asking whether students have mastered a particular subject matter or done well on ubiquitous tests, Michael W. Apple instead challenges readers to probe the deeper questions of whose knowledge the curriculum represents and how it came official. The award-winning *Official Knowledge* offers a powerful examination of the rightist resurgence in education and the challenges it presents to concerned educators. Updates and features of the 3rd edition include: A new and detailed preface that situates it within the current debates within education. Updates throughout all chapters with a special focus on Chapter 2, *Why the Right is Winning*, to document how the Right has changed our commonsense about what counts as a good school, good curricula, good teaching to such an extent that even the Obama Administration's policies for educational reform incorporate much of the neoliberal agenda. A new section on the current controversies over curriculum and textbooks focusing on the very conservative changes in textbook policies and content in Texas and Arizona. The addition of an autobiographical chapter so that the arguments of the book make sense in terms of the concrete struggles over education over a lifetime of work.
