Hands-On Machine Learning with Scikit-Learn, Keras, and TensorFlow Aurélien

Géron, 2019-09-05 Through a series of recent breakthroughs deep learning has boosted the entire field of machine learning. Now even programmers who know close to nothing about this technology can use simple, efficient tools to implement programs capable of learning from data. This practical book shows you how. By using concrete examples, minimal theory, and two production-ready Python frameworks—Scikit-Learn and TensorFlow—author Aurélien Geron helps you gain an intuitive understanding of the concepts and tools for building intelligent systems. You'll learn a range of techniques starting with simple linear regression and progressing to deep neural networks. With exercises in each chapter to help you apply what you've learned, all you need is programming experience to get started. Explore the machine learning landscape, particularly neural networks. Use Scikit-Learn to track an example machine learning project end-to-end. Explore several training models, including support vector machines, decision trees, random forests, and ensemble methods. Use the TensorFlow library to build and train neural networks. Dive into neural network architectures, including convolutional networks, recurrent networks, and deep reinforcement learning. Learn techniques for training and scaling deep neural networks.
