economic and political forces which in turn reveal themselves to be capable of framing reality through the media themselves. Particularly focusing on the topic of the economic crisis the various chapters of this edited volume highlight how the relationship between the media and other forces capable of pervasively exercising their power appears to be paradoxically as strict as it is opaque. Social media and smart mobile technologies have increasingly affected the modalities whereby other institutions and organizations reflect on themselves and develop their worldviews. At the same time however politics and economics experts and strategists have all learned how to exploit this potential for their own purposes. Detecting the opacity that characterizes this form of exploitation is the first step in the acknowledgment of this phenomenon.
