Flat-Panel Displays and Sensors - Principles, Materials, and Processes: Volume 558 Babu R. Chalamala, 2000-05
The MRS Symposium Proceeding series is an internationally recognised reference suitable for researchers and practitioners

Functional Polymer Films, 2 Volume Set Wolfgang Knoll, Rigoberto C. Advincula, 2013-02-12 Very thin film materials have emerged as a highly interesting and useful quasi 2D state functionality They have given rise to numerous applications ranging from protective and smart coatings to electronics sensors and display technology as well as serving biological analytical and medical purposes The tailoring of polymer film properties and functions has become a major research field As opposed to the traditional treatise on polymer and resin based coatings this one stop reference is the first to give readers a comprehensive view of the latest macromolecular and supramolecular film based nanotechnology Bringing together all the important facets and state of the art research the two well structured volumes cover film assembly and deposition functionality and patterning and analysis and characterization The result is an in depth understanding of the phenomena ordering scale effects fabrication and analysis of polymer ultrathin films This book will be a valuable addition for Materials Scientists Polymer Chemists Surface Scientists Bioengineers Coatings Specialists Chemical Engineers and Scientists working in this important research field and industry

Hatalis, 1997-02-12 The proceedings of a symposium held April 1996 in San Francisco California The field is experiencing a rapid growth which currently is expanding from portable computer applications to include display applications for desktop computers and a wide array of consumer and industrial products Seventy six contributions are divided into six sections covering amorphous silicon thin film transistor materials polycrystalline silicon thin film transistor materials liquid crystal display materials transparent conducting oxides field emission display materials and other emissive display materials Annotation copyrighted by Book News Inc Portland OR

Flat Panel Display Materials III: Volume 471 Ron Fulks, 1997-09-10 Flat panel displays are rapidly becoming the displays of choice for a variety of information displaying applications ranging from laptop computers to automobile and cockpit read out devices Passive matrix liquid crystal displays and more recently active matrix liquid crystal displays AMLCDs have led the way in the display revolution In addition emissive displays based on field emission electroluminescence and plasma charge are attracting considerable interest Ultimately however the advancement in flat panel display applications will be driven by cost and performance advantages which are dependent on the advancement of materials and process technologies used to fabricate the displays This book focuses on the materials and large area processes used by the various display technologies both emissive and nonemissive including liquid crystal electroluminescent plasma field emission and

micromechanical displays Topics include AMLCD materials and processes thin film transistors for AMLCDs emissive displays and materials and phosphor materials Flat-Panel Display Materials - 1998: Gregory N. Parsons,Chuang-Chuang Tsai,Theodore S. Fahlen,Carleton H.
