Scramjet Propulsion Dora Musielak, 2022-11-21 Scramjet Propulsion Explore the cutting edge of HAP technologies with this comprehensive resource from an international leader in her field Scramjet Propulsion A Practical Introduction delivers a comprehensive treatment of hypersonic air breathing propulsion and its applications The book covers the most up to date hypersonic technologies like endothermic fuels fuel injection and flameholding systems high temperature materials and TPS and offers technological overviews of hypersonic flight platforms like the X 43A X 51A and HiFIRE It is organized around easy to understand explanations of technical challenges and provides extensive references for the information contained within The highly accomplished author provides readers with a fulsome description of the theoretical underpinnings of hypersonic technologies as well as critical design and technology issues affecting hypersonic air breathing propulsion technologies The book s combination of introductory theory and advanced instruction about individual hypersonic engine components is ideal for students and practitioners in fields as diverse as hypersonic vehicle and propulsion development for missile defense technologies launch aerospaceplanes and civilian transports Over 250 illustrations and tables round out the material Readers will also learn from A thorough introduction to hypersonic flight hypersonic vehicle concepts and a review of fundamental principles in hypersonic air breathing propulsion Explorations of the aerothermodynamics of scramjet engines and the design of scramjet components as well as hypersonic air breathing propulsion combustors and fuels Analyses of dual mode combustion phenomena materials structures and thermal management in hypersonic vehicles and combined cycle propulsion An examination of CFD analysis ground and flight testing and simulation Perfect for researchers and graduate students in aerospace engineering Scramjet Propulsion A Practical Introduction is also an indispensable addition to the libraries of engineers working on hypersonic vehicle development seeking a state of the art resource in one of the most potentially disruptive areas of aerospace research today

Building Information Modeling Nawari O. Nawari, 2018-02-12 Many researchers and software developers have put a lot of effort into finding solutions for automated code checking This book is a good summary of these efforts and provides readers with a comprehensive understanding of the status of such technologies in the industry It also guides readers on implementation of such techniques using the platforms and tools currently available in the industry Issa Ramaji University of North Florida USA Building Information Modeling Automated Code Checking and Compliance Processes covers current and emerging trends in

automating the processes of examining building design against codes and standards of practice The role of Building Information Modeling BIM technologies in these processes is thoroughly analyzed and explains how this new technology is significantly transforming modern architecture engineering and construction AEC domains The book also introduces the theoretical background of computerizing compliance verification including domain knowledge representations building model representations and automated code checking systems An underlying goal for the material covered is to present the use of BIM technology as an integral part of the automated auditing process that can lead to a more comprehensive intelligent and integrated building design a design where an optimized solution can be achieved in harmony with the current codes and standards of practice This new proposed BIM based framework for automating code conformance checking is one of the most powerful methods presently available to reflect actual building code requirements and the methods described in the book offer significant benefits to the AEC industry such as Providing consistency in interpretation of regulatory provisions Reducing code compliance validation errors and the cost and time associated with compliance checking Allows for the ability to self check required aspects before bidding Reduces the amount of time and resources required during design review Allows for optimal design along with faster turnaround on feedback and potentially faster approvals for construction permits by building and infrastructure authorities
