*Other Ways of Growing Old* Pamela T. Amoss,Stevan Harrell,1981 As anthropologists we offer this book about aging in a wide variety of human societies in the hope of its making three contributions First this book will help to remedy a massive neglect of old age by the discipline of anthropology The pioneering work of Leo Simmons 1945 has remained a lonely monument since the 1940 s for despite recent interest in the subject of aging in modern Western societies on the part of social gerontologists and sociologists little has been done by anthropologists on aging in non Western societies Where it has been treated at all it has been in the form either of a few final paragraphs in the discussion of the life cycle or of a simple ethnographic fact among other facts about a certain social system What has been missing has been any attempt to put aging in a cross cultural or comparative perspective to give this vital subject the same treatment that has been

accorded marriage for example or death or inheritance or sex roles Second this book will bring a needed cross cultural perspective to the study of social gerontology The recent explosion of interest in this field has been largely confined to the study of aging in North America and Europe But we anthropologists feel that such a culturally limited study though interesting and productive in its own right is dangerously narrow if it does not consider what aging is like in other societies What aspects of aging for example are human universals and have to be planned for as inevitable and what aspects are cultural particulars and can be avoided modified or strengthened under certain social conditions By presenting both a biological account of the universals of human aging Weiss and specific ethnographic accounts of aging in a wide variety of societies we believe we can help to put North American aging into perspective Third we hope this book will serve as an illustration of a particular anthropological approach to unity and diversity in human societies and cultures Perhaps the main task of sociocultural anthropology is a twofold one the explanation of cross cultural universals somehow rooted either in the biological nature of the human species or in universal imperatives of social organization and the explanation of intercultural variations rooted in a dialectical interaction between culture and the material conditions partially created by culture in which it exists If unity and diversity can indeed be explained in this way the cross cultural study of aging can serve as a paradigm By first setting out what seem to be the universals determined by the biology of the human species and by then exploring the range of variation in cultural solutions we ought to be able to formulate a set of principles that will allow us to explain why variations occur in a certain way Nine ethnographic case studies are enough we believe to enable us to formulate some preliminary hypotheses about the nature and causes of variation in the social process of aging

*The Hours Have Lost Their Clock* Grafton Tanner, 2021-10-12 The Hours Have Lost Their Clock charts the rise of nostalgia in an era knocked out of time In The Hours Have Lost Their Clock Grafton Tanner charts the rise of nostalgia in an era knocked out of time Nostalgia is the defining emotion of our age Political leaders promise a return to yesteryear Old movies are remade and cancelled series are rebooted Veterans reenact past wars while the displaced across the world long for home But who is behind this collective ache for a home in the past Do we need to eliminate nostalgia or just cultivate it better And what is at stake if we make the

wrong choice Moving from the fight over Confederate monuments to the birth of homeland security to the mourning of species extinction Grafton Tanner traces nostalgia's ascent in the twenty first century revealing its power as both a consequence of our unstable time and a defense against it With little faith in a future of climate change and economic anxiety many have turned to nostalgia to weather the present while powerful elites exploit it for their own gain An exploration into the politics of loss and yearning *The Hours Have Lost Their Clock* is an urgent call to take nostalgia seriously The very future depends on it

**Contesting Aging and Loss** Janice Graham, Peter Stephenson, 2010-04-26 Disease and death are a part of life but so too is being well The lively voices found in this book are not shy about stating the ways in which the widely held notion that they are in decline has been a far larger problem than many other features of their lives For students scholars and policy makers the message is to attend to these voices and to design and build better programs that address the social determinants of healthy aging and social inclusion throughout the life course

*The Resilience of New Public Management* Irvine Lapsley, Peter Miller, 2024 New Public Management NPM has been the most significant public policy reform in decades Despite its widespread use it has been a contested policy from its initial adoption A succession of replacement policies has been proposed over NPM's life to date Yet NPM is still in evidence The expression NPM was coined by Hood 1991 It referred to the mimicry of private sector practices on management structures and styles on ownership models and the focus on accounting practices and quantification and performance management within private sector organisations Writings on New Public Management NPM have been extremely influential even if it can no longer be described as new It is often described as a set of management techniques and practices which have now achieved global significance The attractiveness of NPM to policy makers is evident The NPM focus on results coincides with political imperatives NPM has the appearance of ready made answers to policy proposals Many management consultants have become adept at advancing the case for NPM generally and as a solution to specific problems However many academic commentators have criticised NPM implementation programmes Despite such criticism the adherence of policymakers to NPM has ensured its prominent role in public life In this book we outline four dimensions of NPM which focus on understanding both the pervasive nature of NPM and the challenges to the prevailing logic of NPM in public policy

- 1 Mature NPM This is a discussion of NPM in the contemporary environment There is discussion of the emergence of NPM NPM in crisis situations Gaming behaviour in performance management and the impact of the Audit Society This reveals the enduring nature of NPM including perverse outcomes
- 2 NPM in Action This is a discussion which shows NPM's ability to colonise to adapt and its wide presence in government bodies health care and universities
- 3 Alternative Models to NPM These alternatives are governance models the advocacy of coproduction between government organisations and citizens more recent concepts like public value and Trust based management
- 4 Finale an overview of NPM's role in contemporary society This includes a discussion of whether the widespread adoption of accounting and management technologies in support of NPM were merited We comment on how

NPM might reform in the future We also discuss the resilience of NPM and a research agenda
