Bhatnagar, 2022-01-14 History is universally understood as a story of the past In both the volumes history is told in stories only There are no boring dates as that is one singular reason for which people hate history in schools and colleges There are no generic descriptions of the reigns of kings and queens as no one likes monarchies any more Each volume contains 70 80 articles essays but the author calls them reflections absolutely independent of each other They are dated each one of them has an immediate reason to be written for They are spun around in order to make connections with 2 3 nodes of life most importantly making a connection with the present If an event in the past doesn t make a connection with the present then it is not worth digging it out History is not a recipe book that one would refer to for finding a solution to a present problem At the same time those who do not learn from history are condemned to repeat it Author s roots being deep both in India and the US the scenarios are drawn accordingly One of the objectives is to rekindle interest in history in general Ironically the US public has been losing interest in history both contemporary and gone by eras Whereas Indian especially the Hindus are light years away from history in any shape or form Both volumes have the same format Taking into consideration the taste of the readers reflections are divided into four sections **Plums, Peaches and Pears of Education** Satish C. Bhatnagar, 2016-04-07 The title of a book is like the name of a person which amongst the Hindus in particular is very significant It is generally given in a

naam sanskar naming ceremony A family astrologer or temple priest describes the characteristics of a newly born baby based upon the Zodiac signs or horoscope duly prepared A propitious time and name are chosen accordingly For me this process is no less important even when it comes to choosing a title of my book or a Reflection After having given titles to over a thousand Reflections and eight books it still takes considerable amount of time and thought for the naming of a new one The process involves frequent tinkering with both syntax and semantics **Scattered Matherticles** Satish C.
