Cooperative Learning and the Collaborative School Ronald S. Brandt, 1991 Cooperation in the classroom counteracts well established routines and values that nearly all adults and many educators take for granted Education remains a fiercely competitive enterprise and individualistic notions of professionalism predominate Despite the continued importance of independence initiative and personal achievement today s schools are experimenting with consideration sharing collegiality and commitment to group goals This volume contains readings from recent editions of Educational Leadership on cooperative learning and collaborative schools beginning with Robert Slavin s introduction and Ronald Brandt s insistence that cooperation is not un American The articles in the second section discuss various cooperative learning models including Team Assisted Individuation Cooperative integrated Reading and Composition and Group Investigation The third section is

devoted to implementation of cooperative learning and the fourth section highlights the idea of schools as caring communities developed through group work The sixth section provides ideas on how to get started and the seventh section summarizes controversies among various researchers The final section presents articles on the collaborative school focusing on developing teacher collegiality cooperative professional development and school improvement efforts The volume ends with an extensive annotated bibliography divided into nine parts MLH

Exploring Signature Pedagogies Regan A. R. Gurung, Nancy L. Chick, Aeron Haynie, 2023-07-03 From the Foreword These authors have clearly shown the value in looking for the signature pedagogies of their disciplines Nothing uncovers hidden assumptions about desired knowledge skills and dispositions better than a careful examination of our most cherished practices The authors inspire specialists in other disciplines to do the same Furthermore they invite other colleagues to explore whether relatively new interdisciplinary fields such as Women s Studies and Global Studies have or should have a signature pedagogy consistent with their understanding of what it means to apprentice in these areas Anthony A Ciccone Senior Scholar and Director Carnegie Academy for the Scholarship of Teaching and Learning How do individual disciplines foster deep learning and get students to think like disciplinary experts With contributions from the sciences humanities and the arts this book critically explores how to best foster student learning within and across the disciplines This book represents a major advance in the Scholarship of Teaching and Learning SoTL by moving beyond individual case studies best practices and the work of individual scholars to focus on the unique content and characteristic pedagogies of major disciplines Each chapter begins by summarizing the SoTL literature on the pedagogies of a specific discipline and by examining and analyzing its traditional practices paying particular attention to how faculty evaluate success Each concludes by articulating for its discipline the elements of a signature pedagogy that will improve teaching and learning and by offering an agenda for future research Each chapter explores what the pedagogical literature of the discipline suggests are the optimal ways to teach material in that field and to verify the resulting learning Each author is concerned about how to engage students in the ways of knowing the habits of mind and the values used by experts in his or her field Readers will not only benefit from the chapters most relevant to their disciplines As faculty members consider how their courses fit into the broader curriculum and relate to the other disciplines and design learning activities and goals not only within the discipline but also within the broader objectives of liberal education they will appreciate the cross disciplinary understandings this book affords

Learning Methods Shlomo Sharan,1994-02-17 This professional reference overviews cooperative learning and includes sections on generic methods of instruction the application of cooperative learning to particular disciplines and the implementation of programs in schools *Mathematical Tasks in Classrooms Around the World* ,2010-01-01 Mathematical tasks have long been recognized as crucial mediators between mathematical content and the mathematics learner For many people the mathematics classroom is defined by the type of tasks one finds there and this is appropriate Mathematical tasks are the embodiment of the curricular pretext that brings each particular set of individuals together in every mathematics classroom In other contexts individuals come together to engage in musical performances or dramatic performances The performances of the mathematics classroom are largely the performance of mathematical tasks and if we are to understand and facilitate the learning that is the purpose of such settings then we must understand the nature of the performances that we find there The classroom performance of a task is ultimately a unique synthesis of task teacher students and situation Of particular interest are differences in the function of mathematically similar tasks when employed by different teachers in different classrooms for different instructional purposes with different students By making comparison possible between the classroom use of mathematical tasks in different classrooms around the world the analyses reported in this book reveal the profound differences in how each teacher utilises mathematical tasks in partnership with their students to create a distinctive form of mathematical activity The Learner s Perspective Study aims to juxtapose the observable practices of the classroom and the meanings attributed to those practices by classroom participants The LPS research design documents sequences of at least ten lessons using three video cameras supplemented by the reconstructive accounts of classroom participants obtained in post lesson video stimulated interviews and by test and questionnaire data and copies of student written material In each participating country data generation focuses on the classrooms of three teachers identified by the local mathematics education community as competent and situated in demographically different school communities within the one major city The large body of complex data supports both the characterisation of practice in the classrooms of competent teachers and the development of theory Teaching Mathematics for the 21st Century Linda Huetinck,Sara N.

Munshin,2000 For courses in Mathematics Methods for the Secondary School This is the first middle and secondary math methods text to focus on reform and the national standards It prepares teachers for the challenge of assisting all students in reaching the highest level of mathematics according to their interest and realistic ambitions It also provides contemporary methods of teaching mathematics which facilitates successful instruction with a strong understanding of the philosophy and psychology behind sound practices Coverage includes methodology curriculum materials and use of technology accompanied by many practical suggestions for implementation
