Franklin, 2003-01-30 This bk integrates clinical experience w the latest methods of statistical analysis to provide all who have professional stakes in the outcomes of assessment w better methods of hypothesis testing that will lead to more valid reliable assessments of pa **The Neurotransmitter Revolution** Roger D. Masters, Michael T. McGuire, 1994 Extraordinary advances in neurochemistry are both transforming our understanding of human nature and creating an urgent problem Much is now known about the ways that neurotransmitters influence normal social behavior mental illness and deviance What are these discoveries about the workings of the human brain How can they best be integrated into our legal system These explosive issues are best understood by focusing on a single neurotransmitter like serotonin which is associated with such diverse behaviors as dominance and leadership seasonal depression suicide alcoholism impulsive homicide and arson This book brings together revised papers from a conference on this theme organized by the Gruter Institute for Law and Behavioral Research supplemented with articles by leading scholars who did not attend Contributors include psychiatrists neurologists social scientists and legal scholars **The Neurotransmitter Revolution** presents a unique survey of the scientific and legal implications of research on the way serotonin combines with other factors to shape human behavior The findings are quite different from what might have been expected even a decade ago The neurochemistry of behavior is not the same

thing as genetic determinism On the contrary the activity of serotonin varies from one individual to another for many reasons including the individual's life experience social status personality and diet And there are a number of major neurotransmitter systems each of which interacts with the other Behavior culture and the social environment can influence neurochemistry along with inheritance Nature and nurture interact and these interactions can be understood from a vigorously scientific point of view The fact that our actions are heavily influenced by neurotransmitters like serotonin is bound to be disquieting A sophisticated understanding of law and human social behavior will be needed if our society is to respond adequately to these rapid advances in our knowledge This book is an essential step in that direction providing the first comprehensive survey of the biochemical social and legal considerations arising from research on the behavioral effects of serotonin and related neurotransmitters

Malingering, Feigning, and Response Bias in Psychiatric/ Psychological Injury

Gerald Young, 2014-02-11

This book is a comprehensive analysis of the definitions, concepts, and recent research on malingering, feigning, and other response biases in psychological injury forensic disability populations. It presents a new model of malingering and related biases and develops a diagnostic system based on it that is applicable to PTSD, chronic pain, and TBI. Included are suggestions for effective practice and future research based on the literature reviews and the new systems which are useful also because they can be used readily by psychiatrists as much as psychologists. In *Malingering, Feigning, and Response Style Assessment in Psychiatric Psychological Injury*, Dr. Young ambitiously sets out to articulate and synthesize the polarities involved in the assessment of response styles in psychological disabilities including PTSD, pain, and TBI. He does so thoroughly and very even-handedly, neither minimizing the degree that outright faking can be found in substantial numbers of examinees nor disregarding the possibility that there can be causes for validity test failure other than malingering. He reviews the prior systems for classifying evidence of malingering and proposes his own criteria for feigned PTSD. These are conservative and well grounded in the prior literature. Finally, the book contains dozens of very recent references giving testament to Dr. Young's immersion in the personal injury literature as might be expected from his experience as founder and Editor in Chief for *Psychological Injury and the Law*. Reviewer: Steve Rubenzer, Ph.D., ABPP, Board Certified Forensic Psychologist.
