Elements Of Architecture From Form To Place:

Elements of Architecture Pierre von Meiss, 1990 This comprehensive analysis of the whole architectural phenomenon includes logical and methodical extraction of general principles from the prevailing pluralism of approaches Elements of Architecture Pierre von Meiss, 1990 This book analyzes architectural elements drawing general principles from the prevailing pluralism of architectural approaches Von Meiss bridges the gap between history and contemporary work by pinpointing the constant factors that exist in all architecture Elements of Architecture should prove useful to modern practitioners who need to make constant reference to buildings of the past It is also unique in two particular ways it does not get involved in the argument about styles that dominate today's architectural literature and it attempts a synthesis of architectural history and contemporary work Elements of Architecture Pierre von Meiss, 2013-10-08 This internationally significant book analyzes architectural elements drawing general principles from the prevailing pluralism of architectural approaches Von Meiss expertly bridges the gap between history and contemporary work by pinpointing the constant factors that exist in all architecture A comprehensive analysis of the whole architectural phenomenon this valuable book will prove especially useful to modern practitioners who need to make constant reference to buildings of the past Staying away from the ineffectual arguments on styles that dominate today's architectural literature this is the first recent book to attempt such a synthesis of architectural history and contemporary work As such it is unique **Elements of Architecture**, 1992 **Elements of Architecture** Pierre von Meiss, 1993 *Elements of Architecture* Pierre von Meiss, 2013 Modernity has opened the way towards a grand diversity of form However even if architecture is a cultural phenomenon this does not mean it is a product of fashion it is not ephemeral enough for that An architect just starting out is best advised to aim for the essential or to rediscover certain time tested certainties before transgressing them The first part of this work explores the means of compositional architecture followed by the interpretation of the relationships between space light and place Four or five thousand years of history has shown the resilience of certain fundamental principles intrinsic to our discipline that organizes in three dimensions the vital space of man In the second part the author provides certain keys to managing the relationship between form material and construction keeping in mind that the need to build has never been sufficient in itself to design the form of the house or the city Neither dictionary nor encyclopedia this work attempts to fill a gap it proposes an introduction to architectural design and criticism considered in the light of our time Praised by critics and used as a book of reference in numerous schools the first edition of this book has been translated into English Italian German Korean and Chinese Elements of architecture; from form to place P. van Meis, 1990 *Elements of Architecture* Pierre von Meiss, 1990 **Elements of Architecture** Mikkel Bille, Tim Flohr Sorensen, 2016-02-26 Elements of Architecture explores new ways of engaging architecture in archaeology It conceives of architecture both as the physical evidence of past societies and as existing beyond the physical environment considering how people in the past have not just dwelled in buildings but

have existed within them The book engages with the meeting point between these two perspectives For although archaeologists must deal with the presence and absence of physicality as a discipline which studies humans through things to understand humans they must also address the performances as well as temporal and affective impacts of these material remains The contributions in this volume investigate the way time performance and movement both physically and emotionally are central aspects of understanding architectural assemblages It is a book about the constellations of people places and things that emerge and dissolve as affective mobile performative and temporal engagements This volume juxtaposes archaeological research with perspectives from anthropology architecture cultural geography and philosophy in order to explore the kaleidoscopic intersections of elements coming together in architecture Documenting the ephemeral relational and emotional meeting points with a category of material objects that have defined much research into what it means to be human *Elements of Architecture* elucidates and expands upon a crucial body of evidence which allows us to explore the lives and interactions of past societies **Elements of Architecture**, 1979 *Constructing a Place of Critical Architecture in China* Guanghui Ding, 2016-03-09 For the past 30 years The Chinese journal *Time Architecture Shidai Jianzhu* has focused on publishing innovative and exploratory work by emerging architects based in private design firms who were committed to new material theoretical and pedagogical practices In doing so this book argues that the journal has engaged in the presentation and production of a particular form of critical architecture described as an intermediate criticality as a response to the particular constraints of the Chinese cultural and political context The journal's publications displayed a dual critique a resistant attitude to the dominant modes of commercial building practice characterised by rapid and large scale urban expansion and an alternative publishing practice focusing on emerging independent architectural practitioners through the active integration of theoretical debates architectural projects and criticisms This dual critique is illustrated through a careful review and analysis of the history and programme of the journal By showing how the work of emerging architects including Yung Ho Chang Wang Shu Liu Jiakun and Urbanus are situated within the context of the journal's special thematic editions on experimental architecture exhibition group design new urban space and professional system the book assesses the contribution the journal has made to the emergence of a critical architecture in China in the context of how it was articulated debated presented and perhaps even produced within the pages of the publication itself The protagonists of critical architecture have endeavoured to construct an alternative mode of form and space with strong aesthetic and socio political implications to the predominant production of architecture under the current Chinese socialist market economy To rebel against certain forms of domination and suppression by capital and power is by no means to completely reject them rather it is to use them **Analysing Architecture** Simon Unwin, 2020-12-29 Now in its fifth edition *Analysing Architecture* has become internationally established as the best introduction to architecture Aimed primarily at those studying architecture it offers a clear and accessible insight into the workings of this rich and fascinating subject With copious

illustrations from his own notebooks the author dissects examples from around the world and all periods of history to explain the underlying strategies in architectural design and show how drawing may be used as a medium for analysis In this new edition *Analysing Architecture* has been revised and expanded Notably the chapter on How Analysis Can Help Design has been redeveloped to clearly explain this crucially important aspect of study to a beginner readership Four new chapters have been added to the section dealing with Themes in Spatial Organisation on Axis Grid Datum Place and Hidden Material from the Case Studies in previous editions has been redistributed amongst earlier chapters The Introduction has been completely rewritten and the format of the whole book has been adjusted to allow for the inclusion of more and better illustrative examples Works of architecture are instruments for managing orchestrating modifying our relationship with the world around us They frame just about everything we do Architecture is complex subtle frustrating but ultimately extremely rewarding It can be a difficult discipline to get to grips with nothing in school quite prepares anyone for the particular demands of an architecture course But this book will help www.instagram.com/analysingarchitecture

Theorizing a New Agenda for Architecture: Kate Nesbitt, 1996-03 *Theorizing a New Agenda for Architecture* An Anthology of Architectural Theory collects in a single volume the most significant essays on architectural theory of the last thirty years A dynamic period of reexamination of the discipline the postmodern era produced widely divergent and radical viewpoints on issues of making meaning history and the city Among the paradigms presented are architectural postmodernism phenomenology semiotics poststructuralism deconstruction and feminism By gathering these influential articles from a vast array of books and journals into a comprehensive anthology Kate Nesbitt has created a resource of great value Indispensable to professors and students of architecture and architectural theory *Theorizing a New Agenda* also serves practitioners and the general public as Nesbitt provides an overview a thematic structure and a critical introduction to each essay The list of authors in *Theorizing a New Agenda* reads like a Who's Who of contemporary architectural thought Tadao Ando Giulio Carlo Argan Alan Colquhoun Jacques Derrida Peter Eisenman Marco Frascari Kenneth Frampton Diane Ghirardo Vittorio Gregotti Karsten Harries Rem Koolhaas Christian Norberg Schulz Aldo Rossi Colin Rowe Thomas Schumacher Ignasi de Sol Morales Rubi Bernard Tschumi Robert Venturi and Denise Scott Brown and Anthony Vidler A bibliography and notes on all the contributors are also included

Exercises in Architecture Simon Unwin, 2022-08-01 This revised edition of *Exercises in Architecture* Learning to Think as an Architect is full of new content building on the success of the previous edition All the original exercises have been revised and new ones added with the format changing to allow the inclusion of more supplementary material The aim remains the same to help pre or early course architecture students begin and develop their ability to think as architects Learning to do architecture is tricky It involves awakening abilities that remain dormant in most people It is like learning language for the first time a task made more mystifying by the fact that architecture deals not in words but in places places to stand to walk to sit to hide to sleep to cook to eat to work to play to worship This book was

written for those who want to be architects It suggests a basis for early experiences in a school of architecture but it could also be used in secondary schools and colleges or as self directed preparation for students in the months before entering professional education Exercises in Architecture builds on and supplements the methodology for architectural analysis presented in the author s previous book Analysing Architecture the Universal Language of Place Making fifth edition 2021 and demonstrated in his Twenty Five Buildings Every Architect Should Understand Routledge 2015 Together the three books deal with the three aspects of learning any creative discipline 1 Analysing Architecture provides a methodology for analysis that develops an understanding of the way architecture works 2 Twenty Five Buildings explores and extends that methodology through analysis of examples as case studies and 3 Exercises in Architecture offers a way of expanding understanding and developing fluency by following a range of rudimentary and more sophisticated exercises Those who wish to become professional architects wherever in the world they might be must make a conscious effort to learn the universal language of architecture as place making to explore its powers and how they might be used The exercises in this book are designed to help

Architecture, Ethics, and the Personhood of Place Gregory Caicco, 2007 Architecture and environmental design are among the last professional fields to develop a sustained and nuanced discussion concerning ethics Hemmed in by politics and powerful clients on one side and the often unscrupulous practices of the construction industry on the other environmental designers have been traditionally

reluctant to address ethical issues head on And yet the rapid urbanization of the world s population continues to swell into new megacities each less healthy welcoming secure or environmentally sustainable than the next Green carbon reduced and sustainable building practices are important ways architects have recently responded to the symptoms of the crisis but are these efforts really addressing the core issues Taking the Dine Navajo Hogan Song a song used to protect and nourish the personhood of newly constructed dwellings as their inspiration the architects philosophers poets and other contemporary scholars contributing to this volume demonstrate that a deeper more radical change in our relationship to the built world needs to occur While offering a careful critique of modernist corporate or techno enthralled design practices these essays investigate an alternative relational ecology whose wisdom draws from ancient and often marginalized voices if not the whisperings of the earth itself Contributors include Richard Kearney Alberto Perez Gomez Juhani Pallasmaa Karsten Harries Edward Casey Susan Stewart David Abram Stacy Alaimo Jace and Laura Weaver Philip Sheldrake and Sebnem Yucel Young
