Elephants Of The Tsunami:

Elephants of the Tsunami Jana Laiz, 2005 Based on a true story tells of eight elephants working on the beach in Thailand that sound the alarm and rescue as many people as they can when a tsunami hits *The Night the elephants Cried - a story of the Tsunami* Nancy H. Murray, 2017-03-09 The elephant emerged from the water a moving wall of gray cut against a startling blue sky Wild high grasses brushed the columns of her huge legs as she dwarfed the hill that rose behind her Massive footprints left pools of river water where she emerged from the pond that had slaked her thirst and provided her family an afternoon of muddy play Gently flapping ears became still the pads on her great feet sank deep into the earth She lifted her trunk stood as if transfixed Dusk approached and banished a reluctant sun From miles away something was coming

What the Ear Hears (And Doesn't) Richard Mainwaring, 2022-12-27

You ll never listen to the world the same way again A truly ear opening experience Chris Ferrie award winning physicist and author of *Where Did the Universe Come From And Other Cosmic*

Questions For readers of Neil deGrasse Tyson and Bill O Neill What the Ear Hears and Doesn't is a fascinating science book for adults that explores the physics principle of frequency and the sometimes weird role it plays in our everyday lives What do the world's loneliest whale a black hole and twenty three people doing Tae Bo all have in common In 2011 a skyscraper in South Korea began to shake uncontrollably without warning and was immediately evacuated Was it an earthquake An attack No one seemed quite sure The actual cause emerged later and is utterly fascinating Twenty three middle aged folks were having a Tae Bo fitness class in the office gym on the twelfth floor Their beats had inadvertently matched the building's natural frequency and this coincidence harnessing a basic principle of physics caused the building to shake at an alarming rate for ten minutes Frequency is all around us but little understood Musician composer TV presenter and educator Richard Mainwaring uses the concept of the Infinite Piano to reveal the extraordinary world of frequency in a multitude of arenas from medicine to religion to the environment to the paranormal through the universality of music and a range of memorable human and animal stories laced with dry humor Whether you're science curious musically inclined or just want to know what a Szechuan pepper has to do with physics What the Ear Hears and Doesn't is an immensely enjoyable read filled with did you know trivia you'll love to share with friends

[The Disaster Profiteers](#) John C. Mutter, 2015-08-11 Natural disasters don't matter for the reasons we think they do They generally don't kill a huge number of people Most years more people kill themselves than are killed by Nature's tantrums And using standard measures like Gross Domestic Product GDP it is difficult to show that disasters significantly interrupt the economy It's what happens after the disasters that really matters when the media has lost interest and the last volunteer has handed out a final blanket and people are left to repair their lives What happens is a stark expression of how unjustly unequal our world has become The elite make out well whether they belong to an open market capitalist democracy or a closed authoritarian socialist state In Myanmar a country ruled by a xenophobic military junta the generals and their cronies declared areas where rice farms were destroyed by Cyclone Nargis as blighted and simply took the land In New Orleans the city was re-shaped and gentrified post Katrina making it almost impossible for many of its poorest mostly black citizens to return In The Disaster Profiteers John Mutter argues that when no one is looking disasters become a means by which the elite prosper at the expense of the poor As the specter of increasingly frequent and destructive natural disasters looms in our future this book will ignite an essential conversation about what we can do now to create a safer more just world for us all
