**Reduce Change to Increase Improvement** Viviane Robinson, 2017-07-27 Too much change not enough improvement. Planned changes often fail because those designing them underestimate the complexity of implementation. Reduce Change to Increase Improvement provides a practical structure for helping system and school leaders increase improvement while reducing ineffective change and innovation. By drilling down to the beliefs and values that inform the actual practice of change, leaders Robinson identifies the mindset processes and actual behaviors that contribute to successful reform efforts and importantly provide school leaders with concrete tools that enable them to be more effective. The structures described in the book are illustrated by numerous examples, cases, and conversation extracts and center on four phases of engagement: Agreeing about the problem to be solved, Revealing the beliefs that sustain the current practices, Evaluating the relative merit of the existing practices and proposed theory, Implementing and monitoring the new theory of action. Finally, a serious evidence-proven book about educational change that takes a different tact, beginning with the impact on the learner. Reduce Change to Increase Improvement is a treasure trove of concrete information for educational leaders. Robinson is always cautious about change for change's sake, brilliantly delineates each step of the way for leaders using authentically documented conversations and practical discussion starters that guide us through this collective inquiry approach towards student improvement.
