First World Hunger Food Security And Welfare Politics:

First World Hunger Graham Riches, 2016-07-27 *First World Hunger* examines hunger and the politics of food security and welfare reform 1980-95 in five liberal welfare states: Australia, Canada, New Zealand, the UK, and the USA. Through national case studies, it explores the depoliticization of hunger as a human rights issue and the failure of New Right policies and charitable emergency relief to guarantee household food security. The need for alternative integrated policies and the necessity of public action are considered essential if hunger is to be eliminated.

The Politics of Food Insecurity in Canada and the United Kingdom Zsófia Mendl-Zambo, Dennis Raphael, 2025-01-07 Addressing a neglected area in academic research, media coverage, and public understanding, this book takes a critical political economy approach to understanding food insecurity in Canada and the UK. It examines how current economic and political systems create food insecurity and why food charity does little to address the problem, diverting the attention of policy makers, the media, and the public from the sources of food insecurity. This book provides a vision of a future whereby public control over the distribution of resources, including food, will eliminate food insecurity and other conditions that threaten health.

First World Hunger Revisited G. Riches, T. Silvasti, 2014-09-11 Is food aid the way of the future? What are the prospects for integrated public policies informed by the right to food? *First World Hunger Revisited* investigates the rise of food charity and corporately sponsored food banks as effective and sustainable responses to increasing hunger and food poverty in twelve rich food-secure societies.

The Routledge Handbook of Food Ethics Mary Rawlinson, Caleb Ward, 2016-07-01 While the history of philosophy has traditionally given scant attention to food and the ethics of eating, in the last few decades the subject of food ethics has emerged as a major topic encompassing a wide array of issues, including labor justice, public health, social inequity, animal rights, and environmental ethics. This handbook provides a much-needed philosophical analysis of the ethical implications of the need to eat and the role that food plays in social, cultural, and political life. Unlike other books on the topic, this text integrates traditional approaches to the subject with cutting-edge research in order to set a new agenda for philosophical discussions of food ethics. *The Routledge Handbook of Food Ethics* is an outstanding reference source to the key topics, problems, and debates in this exciting subject and is the first collection of its kind. Comprising over 35 chapters by a team of international contributors, the Handbook is divided into 7 parts: the phenomenology of food, gender and food, food and cultural diversity, liberty, choice, and food policy, food and the environment, farming and eating other animals, food justice. Essential reading for students and researchers in food ethics, it is also an invaluable resource for those in related disciplines such as environmental ethics and bioethics.

Hungry Britain Hannah Lambie-Mumford, 2017-07-05 Examining the prolific growth of UK charitable emergency food provision over the past fifteen years, *Hungry Britain* uses the human right to food as a pathway to developing solutions to food poverty. Hannah Lambie-Mumford draws on data from the country's two largest charitable food providers to explore the effectiveness of this emerging system of food acquisition, its enduring sustainability,

and most importantly where responsibility lies for ensuring that all people can realize their human right to food She shows that the increasing tendency of charitable food providers to take responsibility for protecting people against food poverty occurs in tandem with significant cuts to the welfare state cuts shaping both the need for and nature of emergency food provision Arguing for a clear rights based framework this book envisions a future where a range of actors from the state to charities and the food industry will be jointly accountable in combating food poverty
