

SECTION ONE

PREPARATION

1-1 REGISTRATION CARD

Be sure to fill out and send in your registration card as soon as you receive your new motor. The serial number is stamped on the identification plate.

1-2 ENGINE COVER

Remove the engine cover for access to the powerhead. Squeeze the cover clamp (Fig. 2 - No. 14) to release the latch, then tap and lift the front of the cover up and pull it up and out.

To install the cover, slip the two brackets at the rear of the cover into the holes in the mounting plate, then swing the front of the cover down and back until it snaps into place and the cover clamps separate. Push up on the cover to be sure it is properly latched.

1-3 HOISTING AND HANDLING

The lifting bracket on the top of the powerhead (Fig. 1 - No. 3) is designed to balance and support the motor properly when hoisting. It's best to support the motor on a transom-type mount whenever it is off the boat. If a transom-type mount is not available, lay the motor in a position where it is supported by the two points of the "V" at the rear of the powerhead. Always keep the propeller end at a lower level than the powerhead — this will prevent any possibility of oil draining into the cylinders.

1-4 CHECKING THE GEAR HOUSING OIL LEVEL

Although the gear housing was filled with oil at the factory, the

FIGURE 3

oil level should be checked, by your dealer or yourself, before the motor is run. Allow the motor to stand in a vertical position for a few minutes, then slowly remove the vent plug screw and gasket. (See figure 3.) Oil should appear at the vent hole. If it does not, add oil (see Section 4-2, page 18) until the level reaches the vent hole.
