extensive overview of the various scale model kits covering the subject currently available on the market Reconnaissance Planes Since 1945 Frank Schwede, 2018-01-30 Reconnaissance aircraft have always been the spearhead of the various air forces helping to provide the basis for any further military operations At the time of the Cold War and before the satellite era the use of reconnaissance aircraft reached its zenith as the warring nations were determined to know what was happening on the other side Consequently powerful aircraft emerged during this time especially in terms of deployment altitude speed and flight time achievements which have been largely unrecognised until now **Jane's All the World's Aircraft, 1999-2000** Paul Jackson, 1999 Jane's All the World's Fighting Ships Frederick Thomas Jane, 1985 *The Rand McNally Encyclopedia of Military Aircraft, 1914-1980* Paolo Matricardi, 1981 Aircraft of World War 3 Anthony Robinson, 1983 **The Encyclopedia of Aviation** Paul Beaver, 1986 **Illustrated Encyclopedia of Modern Warplanes** Outlet, Outlet Book Company Staff, Doug Richardson, Random House Value Publishing Staff, Rh Value Publishing, 1988-12 Soviet and Russian Special Mission Aircraft Yefim Gordon, Dmitriy Komissarov, 2022 In the years after World War II aircraft optimized for various kinds of special missions began assuming ever greater importance in the inventories of the world's leading air forces The Soviet Union was no exception numerous special mission versions of Soviet military fixed wing aircraft and helicopters were developed and fielded and the process is continuing in modern Russia Some of them have seen action in various armed conflicts including the Afghan War the Chechen Wars and most recently the Syrian War The need to control friendly forces on the move and manage airborne air defense assets efficiently resulted in the development of airborne early warning and control AEW C aircraft The first of these in the Soviet inventory was the early 1960s vintage Tupolev Tu 126 which was replaced in the 1980s by the Ilyushin Beriyev A 50 The latter has been constantly upgraded but is now due for replacement by the latest A 100 An equally important role is filled by airborne command posts mostly based on airliners including the Ilyushin Il 22 army level ABC P the Tu 214PU and the Il 80 national emergency airborne command post the Russian equivalent of the Boeing E 4 doomsday aircraft The latter may be replaced by a specialised derivative of the Il 96 400 airliner Rotary wing aircraft in this class were also developed such as the Mil Mi 8VzPU and Mi 6VKP Mi 22 Another important class is reconnaissance aircraft of various categories photo reconnaissance electronic intelligence nuclear biological chemical reconnaissance radiation intelligence RINT These were represented by ELINT versions of bombers including the Tu 22 and Tu 22M airliners and transports ELINT versions of the Antonov An 12 and An 26 transports the Il 20 derivative of the Il 18 airliner RINT versions of the An 12 and the An 24 airliner etc A separate chapter covers electronic countermeasures aircraft such as specialized versions of the Tu 16 and Tu 22 bombers and An 12 transport the latest Il 22PP the Army Aviation's many EC M versions of the Mi 8 helicopter including the latest Mi 8MTPR and the heavy Mi 10PP A singularly important class is in flight refueling tankers supporting the operations of both heavy aircraft notably strategic bombers and tactical jets These include tanker versions of the Tupolev Tu 16 and Myasishchev M 4 3MS series bombers and the Il 78 including the latest Il

78M 90 Another category which assumed considerable importance is search and rescue aircraft such as the naval An 12PS equipped to carry a paratroppable lifeboat and the latest Beriyev Be 200PS amphibian able to pick up survivors at the scene of a maritime disaster The book is illustrated with numerous previously unpublished photos line drawings and many color side views *Soviet-Russian AWACS Aircraft* Yefim Gordon,Dmitriy Komissarov,2010 The need to ensure effective protection of the Soviet airspace in areas lacking adequate cover by ground radars led the nation s aircraft designers to start working on airborne early warning systems The Tupolev OKB was the first among the nation s aircraft design bureaus to create an eye in the sky evolving the Tu 126 AEW aircraft from the Tu 114 long haul turboprop airliner The aircraft entered service in 1961 filling an important role with the Soviet Air Force until replaced in the early 1980s by the Ilyushin Beriyev A 50 AWACS based on the IL 76MD transport In addition to these two types the book describes the highly unorthodox Antonov An 71 with its tail mounted rotodome intended for operations from a large aircraft carrier which eventually never materialized and the Kamov Ka 31 shipboard AEW helicopter Due mention is also made of projects that never got off the drawing board the Tu 156 IL 150 and Yakovlev Yak 44 Famous Russian Aircraft: Ilyushin Il-28 E. Gordon,Yefim Gordon,Dmitriy Komissarov,2015 The Il 28 tactical bomber was a success in all its roles From Torpedo bomber reconnaissance trainer and mail carrier numerous specialized versions were also developed including testbeds for avionics weapons and aircraft systems A true fighting machine by the mid 1950s it became the main strike aircraft of the Soviets and later saw action in various armed conflicts in the Middle East Asia and Africa *Ilyushin Il-2* Yefim Gordon,Sergey Komissarov,2010 This is the definitive history of the Ilyushin Il 2 Sturmovik and provides detailed coverage on every aspect of this famous warplane This is perhaps the most famous aircraft in the history of Russian and Soviet aviation During World War 2 this rugged ground attack aircraft was arguably the Soviets most effective weapon Protected by its heavy armor the low flying aircraft was incredibly difficult to shoot down and its powerful array of weaponry included a cannon machine guns rockets and special HEAT antitank bombs It was capable of penetrating the armor of every German tank in the field at the time including the Panther and Tiger tanks as well as reaping destruction among the ranks of enemy infantry on the ground The Il 2 was so successful that the design was produced in greater numbers than any other military aircraft in history with over 40 000 being built between 1941 and 1955 **First Soviet Jet Bombers** Yefim Gordon,2004 As World War II drew to a close the Soviet government was well aware that today s allies would soon be tomorrow s adversaries This meant new bombers had to be developed for dealing strikes at the potential adversaries military and political centers Having gained access to German jet aircraft technology and the men behind it in 1945 the Soviet Union put them to good use when developing its own jet bombers The first jet bomber to fly in the USSR was the Junkers EF131 Built in 1946 it was based on the unconventional forward swept wing Ju 287 V2 which had been captured in incomplete form This was followed by the EF140 a similar FSW design differing in powerplant and the equally unusual T tailed bicycle gear aircraft 150 developed by

Brunolf Baade which was ultimately rejected in favor of the Tupolev Tu 16 The first wholly indigenous Soviet jet bomber came from the Ilyushin design bureau it was the four engined IL 22 of 1947 Other experimental Ilyushin bombers the IL 30 IL 46 and IL 54 which lost out to competing designs are described in this book as are the Tupolev aircraft 77 aircraft 82 and the aircraft 72 73 78 series which culminated in the Tu 14 twinjet bomber built on a small scale mainly for the Soviet Navy

Gordon,Dmitriy Komissarov,Sergey Komissarov,2004 Established in 1934 the Ilyushin design bureau is one of the best known Soviet Russian aircraft design companies Over the years the Ilyushin OKB has developed aircraft for widely varying roles Its first aircraft to achieve production status the DB 3 bomber entered service in 1936 The IL 2 Shturmovik armored attack aircraft brought Ilyushin well earned fame this aircraft fought with considerable success during World War II The OKB s involvement with combat aircraft continued with the experimental IL 22 four jet counterpart of the English Electric Canberra However it was those years that marked the OKB s transition to transport aircraft from the twin engined IL 12 of 1945 developed as a DC 3 replacement followed by many successful aircraft including the four turboprop IL 18 airliner 1957 the four turboprop long half IL 62 1961 the IL 76 military civil freighter 1971 and the first Soviet wide body airliner the IL 86 of 1976 The company has also moved into general aviation with the IL 103 four seater
