*Fundamentals of Production Logistics* Peter Nyhuis,Hans-Peter Wiendahl,2008-10-17 This is a much needed text that comprehensively encapsulates for the first time the fundamentals of modeling Logistic Operating Curves for production and storage processes The text includes information on how they can be derived and calculated based on standard operating data

*Fundamentals of Production Logistics* Peter Nyhuis,Hans-Peter Wiendahl,2009      Fundamentals of Production Logistics Peter Nyhuis,Hans-Peter Wiendahl,2008-09-19 At last here is what logistics researchers have been waiting for a book that comprehensively encapsulates for the first time the fundamentals of modeling Logistic Operating Curves for production and storage processes The text includes information on how they can be derived and calculated based on standard operating data In doing so the authors clearly demonstrate the mutual dependencies between the often contradictory logistic objectives i e on the one hand low throughput times and high delivery reliability and on the other hand low WIP levels and high rates of utilization Moreover they also explain how these objectives can be improved using the Logistic Operating Curve Theory and why this method thus provides an interesting alternative to simulations      *Advances in Production, Logistics and Traffic* Uwe Clausen,Sven Langkau,Felix Kreuz,2019-02-25 The series of Interdisciplinary Conferences on Production Logistics and Traffic ICPLT address the research community as well as practitioners in these fields with special attention to links and interfaces between the three disciplines The fourth ICPLT in particular deals with technology from intralogistics to automated trucking driving as well as the societal aspects of commercial transport To contribute to a high level and beneficial exchange between authorities in politics and municipalities with researchers and practitioners in production and logistics management the ICPLT has asked for contributions from the three disciplines to better understand innovative technologies best practises and latest results These contributions have been evaluated and selected based on a double blind review process to become part of this book It comprises 21 contributions examining trends and challenges for commercial transport as the essential link for production logistics and society Therefore innovative technologies and strategies are presented and discussed to better understand the interdependencies conflicts of interest and to develop feasible solutions Topics Simulation Optimization in Production and Logistics Freight Transport Demand Modelling Intralogistics Logistics Facilities Policy Human Factors Production Maintenance Supply Chain Management Sustainable Logistics Energy Target Groups Representatives of public authorities municipalities politics Actors of sectoral transport spatial planning Actors of production logistics Researchers in the disciplines production logistics transport spatial planning      Control Theory Applications for Dynamic Production Systems Neil A. proceedings show that transformations can only succeed through the realization of both detailed technical improvements in production technologies and optimized production organization *Advances in Production Management Systems. Smart Manufacturing and Logistics Systems: Turning Ideas into Action* Duck Young Kim, Gregor von Cieminski, David Romero, 2022-09-18 This two volume set IFIP AICT 663 and 664 constitutes the thoroughly refereed proceedings of the International IFIP WG 5.7 Conference on Advances in Production Management Systems APMS 2022 held in Gyeongju South Korea in September 2022. The 139 full papers presented in these volumes were carefully reviewed and selected from a total of 153 submissions. The papers of APMS 2022 are organized into two parts. The topics of special interest in the first part included AI Smart Manufacturing Simulation Service Systems Design Engineering Industrial Digital Transformation Sustainable Production Management and Digital Supply Networks. The second part included the following subjects: Development of Circular Business Solutions and Product Service Systems through Digital Twins, Farm to Fork Production Management in Food Supply Chains, Urban Mobility and City Logistics, Digital Transformation Approaches in Production Management, Smart Supply Chain and Production in Society 5.0 Era, Service and Operations Management in the Context of Digitally enabled Product Service Systems, Sustainable and Digital Servitization, Manufacturing Models and Practices for Eco Efficient Circular and Regenerative Industrial Systems, Cognitive and Autonomous AI in Manufacturing and Supply Chains, Operators 4.0 and Human Technology Integration in Smart Manufacturing and Logistics, Environments, Cyber Physical Systems for Smart Assembly and Logistics in Automotive Industry and Trends, Challenges and Applications of Digital Lean Paradigm. Reliable, Secure and Resilient Logistics Networks Lech Bukowski, 2018-12-13 This book synthesizes the current state of knowledge on logistics infrastructures and process modeling especially for processes that are exposed to changing and uncertain environments. It then builds on this knowledge to present a new concept of dependable product delivery assurance. In order to quantitatively assess dependability a service continuity oriented approach as well as an imperfect knowledge based concept of risk are employed. This approach is based on the methodology of service engineering and is closely related to the idea of the resilient enterprise as well as the concept of disruption tolerant operation. The practical advantages of this concept are subsequently illustrated in three sample applications: a modified FMECA method, an expert system with fuzzy reasoning and a simulation agent based model of logistic network resilience. The book will benefit a broad readership including researchers especially in systems science, management science and operations research professionals especially managers, project managers and analysts and undergraduate, postgraduate and MBA students in engineering.

*Dynamics in Logistics* Hans-Jörg Kreowski, Bernd Scholz-Reiter, Klaus-Dieter Thoben, 2013-03-28 The volume comprises the proceedings of the third International Conference on Dynamics in Logistics LDIC 2012. The scope of the conference targeted the identification, analysis and description of the dynamics of logistic processes and networks.
