Fundamentals Of Safe Motherhood Reproductive Health For Communities:

An Introduction to Community Health James F. McKenzie, R. R. Pinger, Jerome Edward Kotecki, 2005 The fifth edition of this best selling introductory text has been updated to reflect the latest trends and statistics in community health in an effort to effectively address the health issues facing today's communities with emphasis on developing the knowledge and skills necessary for a career in health education. An Introduction to Community Health Fifth Edition covers such topics as epidemiology, community organization, program planning, minority health, health care, mental health, environmental health, drugs, safety and occupational health.

Social and Behavioral Foundations of Public Health Jeannine Coreil, 2010 This book is intended as a core textbook for courses in public health that examines current issues in health from a social and behavioral science perspective. It is a cross disciplinary course: public health, medical sociology, health psychology, medical anthropology and thus there are many ways to teach the course based on a particular instructor's perspective. The authors wrote the book because they were dissatisfied with the way other texts apply social science to public health and found that many texts being used were from related fields such as medicine, nursing or general health. The authors are planning to do a major revision based on reviews they have collected and the reviews we have collected. We believe the revised edition will essentially be a new text based on rich feedback. They will include new theory, new cases, new research and a rich ancillary package. They will also reduce the frameworks presented to make the book more readable to students.

Under the Banyan Tree Sheldon J. Segal, 2003-01-30 Human population growth has been a topic of speculation and spirited debate since the English economist Thomas Malthus predicted that population will increase faster than the food supply with catastrophic results Today even as fertility rates decline on a global scale relentless increases in population and other population driven factors threaten not only the food supply but also the stability

of entire regions of the world No single individual has contributed more to our understanding of scientific matters related to human population than Sheldon Segal has Pioneer in contraceptive research and developer of Norplant Segal has orchestrated many of the international clinical trials of new contraceptives in the last quarter century In this one volume Segal examines how population factors impact critical scientific elements of human affairs contraception family planning environmental degradation climate change food and fresh water supply and the threat of newly emerging diseases As we follow Segal from meetings with heads of state and foreign ministers through to his impassioned grassroots efforts to secure suitable funds for impoverished countries we gain a behind the scenes perspective on how individuals and nations juggle humanitarian and scientific concerns with political agendas Informed at every turn by Segal s keen intelligence and humane values *Under The Banyan Tree* skillfully blends engaging narrative with history and analysis providing a dramatic and all encompassing portrait of this most basic of human concerns
