International Schools Mary Hayden,Jeff Thompson,2016-03-01 The foundation of the first international schools of the modern era well over a century ago and their burgeoning growth over recent years provides the

context in this book for a series of personal perspectives written by some of those who have been involved centrally in their development. As the schools themselves have increased not only in number and geographical distribution but also in diversity of style and ownership so have a range of complex issues arisen relating to their fundamental purposes, the curricula that they choose what should be taught and what should be learned, the nature of their organization including leadership and management and their potential contributions in responding to a perceived global need and in influencing the promotion of international education in national systems of schools. The distinguished group of authors contributing to this volume identify the current issues surrounding the rapid evolution of international schools and likely future directions of development based on their own impressive personal and professional experience of the sector. That both comparative and international education genres are to be found in approaches taken in the various chapters means that the book will be of interest and value not only to teachers in international schools but also to those working in national schools and to researchers in colleges and universities worldwide.

Leadership for Tomorrow Malcolm Groves, John West-Burnham, 2017-11-13

In *Leadership for Tomorrow: Beyond the School Improvement Horizon* Malcolm Groves, Andrew Hobbs and John West Burnham present a vision led analysis of what needs to change if schools are really to equip children and young people to thrive in our ever changing world. Continually adding improvements to existing models of schooling isn't enough, we need a more radical reconceptualisation of schooling's function and purpose. We need school leaders who can look beyond the horizon and lead on the strength of lessons learned from the here and now. In *Leadership for Tomorrow* Groves, Hobbs and West Burnham expertly examine what needs to change if we are to lead our schools beyond today's limited school improvement horizon and explore the nature of the change leadership which can make this happen. Rooted in the direct experience of innovative and successful school leaders, *Leadership for Tomorrow* presents a wide range of strategies and case studies that will enable and inspire leaders to future proof their school improvement approach and to fashion better futures for the children and young people in their care. Furthermore, by sharing their research informed insight into and vision for the evolving nature of education, the authors hope to encourage leaders to go further in building both their own and their school's capacity to live, learn and grow successfully. Split into three parts that interweave both theory and practice, *Leadership for Tomorrow* poses a number of questions throughout to stimulate thinking about current and emerging issues in education and argue that consequent responses will vary in different contexts. Part One sets out and justifies theoretically the principles and values that underpin the authors' vision for education and signposts the evidence which highlights the limitations of short term thinking and the reasons for why it is destined to fail. In Part Two the authors focus on more practical matters by presenting case studies of five school leaders to examine their work through the lens of the four quadrant Schools of Tomorrow Framework which depicts the beyond outstanding school as one that delivers highly effective family and community engagement and preparation for the future as well as the highest levels of achievement and of well being and involvement.

Part Three then blends theory and practice with an in depth analysis of what these leaders experiences can tell us about developing new understandings of leading change and school improvement for the future which are at one and the same time values based and evidence informed Leadership for Tomorrow is the result of nearly a decade of thinking research and observation of leadership practice which Groves Hobbs and West Burnham have undertaken in a range of settings the authors have written up some of this experience previously for Schools of Tomorrow SoTo a small research and development group made up of school leaders working together to shape a better future for their schools Whilst Leadership for Tomorrow is primarily focused on changes within the English educational system the authors hope that the lessons derived from the book s content will be of interest to leaders in other school systems too Suitable for school leaders those preparing for leadership and those with an interest in leadership development and policy
