Cold War demonstrated the historical possibility of peaceful change and seemingly showed the superiority of non realist approaches in International Relations Yet in the post Cold War period many European countries have experienced a resurgence of a distinctively realist tradition geopolitics Geopolitics is an approach which emphasizes the relationship between politics and power on the one hand and territory location and environment on the other This comparative study shows how the revival of geopolitics came not despite but because of the end of the Cold War Disoriented in their self understandings and conception of external roles by the events of 1989 many European foreign policy actors used the determinism of geopolitical thought to find their place in world politics quickly The book develops a constructivist methodology to study causal mechanisms and its comparative approach allows for a broad assessment of some of the fundamental dynamics of European security

Geopolitical Constructs Colin Flint, 2016-09-19 This innovative book tells a unique story about D Day one that does not concentrate on the soldiers who hit the beaches or the admirals and generals who commanded them Instead Colin Flint brings engineers businessmen and bureaucrats to center stage Through them he offers a different way of thinking about war one that sees war as an ongoing set of processes in which seemingly isolated acts are part of broader historical developments Developing the concept

of geopolitical constructs to understand wars the author connects specific events to long term and global geopolitical arrangements Focusing on the construction of the Mulberry Harbours massive artificial structures dragged across the English Channel in the immediate wake of the invading force Flint illustrates how the process of making war links a vast array of people institutions and places as well as past events and future outcomes He argues that the people who designed and built the Harbours became geopolitical subjects by producing pieces of engineering that helped shape the course of World War Two and the Cold War that followed which created a militarized trans Atlantic that remains today Using previously unpublished archival material to give voice to those who made the Mulberry Harbours and wartime strategy this original study broadens the historical and geographical scope of how we understand war showing how the everyday actions of individuals made and were made by geopolitical settings
