Recommendations of the Committee for Waterfront Structures Harbours and Waterways HTG, 2015-11-09. The EAU 2012 takes into account the new generation of standards which is shortly to be introduced into the building control system; it consists of Eurocode 7, the associated national application documents and additional national regulations DIN 1054:2010. In certain cases, partial safety factors are determined differently based on experience in practice. This means that the safety standard of sea and port buildings remains in place; the recommendations nevertheless satisfy the requirements for international recognition and application regarding the planning, design, specification, tender procedure, construction and monitoring as well as the handover of and cost accounting for port and waterway systems under uniform criteria.
