Multilingual Interpretation of European Union Law Mattias Derlén, 2009-01-01 At head of title Kluwer Law International

Foreign Language Education in Multilingual Classrooms Andreas Bonnet, Peter Siemund, 2018-10-15 This volume challenges traditional approaches to foreign language education and proposes to redefine them in our age of international migration and globalization Foreign language classrooms are no longer populated by monolingual students but increasingly by multilingual students with highly diverse language backgrounds This necessitates a new understanding of foreign language learning and teaching The volume brings together an international group of researchers of high caliber who specialize in third language acquisition teaching English as an additional language and multilingual education In addition to topical overview articles on the multilingual policies pursued in Europe Africa North America and Asia as well as several contributions dealing with theoretical issues regarding multilingualism and plurilingualism the volume also offers cutting edge case studies from multilingual acquisition research and foreign language classroom practice Throughout the volume multilingualism is interpreted as a valuable resource that can facilitate language education provided it is harnessed in appropriate conditions

Intelligent Tutoring Systems for Foreign Language Learning Merryanna L. Swartz, Masoud Yazdani, 2012-12-06 Multilingual communication within the world community is important for economic political and cultural interactions In a global environment where other languages are increasing in importance in addition to recognized international standards i.e. English and French language learning is becoming more important for improved international relations At the same time recent advances in instructional technology make the promise of building intelligent tutoring systems in advanced technology laboratories to teach these language skills a reality in the near future These tutoring systems therefore may help us foster improved methods for acquiring languages As active language learners and instructional technology researchers we felt an international meeting with similar individuals was needed to discuss how such advanced tutoring systems are to be designed and implemented We held such a meeting the results of which are presented in this volume The purpose of this Advanced Workshop sponsored by the NATO Scientific Affairs Division was to bring together a multidisciplinary group of researchers who were active in the development of intelligent tutoring systems for foreign language learning Participants came from computer science computational linguistics psychology and foreign language learning Washington D C was selected for the Workshop site since it is Merryanna's home city the capitol of the United States and an international multilingual community in its own right Masoud agreed to the location with a promise to

Workshop, Carol Peters, 2007-09-06 This book constitutes the thoroughly refereed postproceedings of the 7th Workshop of the Cross Language Evaluation Forum CLEF 2006 held in Alicante Spain September 2006 The revised papers presented together with an introduction were carefully reviewed and selected for inclusion in the book The papers are organized in topical sections on Multilingual Textual Document Retrieval Domain Specific Information Retrieval i CLEF QA CLEF Image CLEF CLSR WebCLEF and GeoCLEF **EuroWordNet: A multilingual database with lexical semantic networks** Piek Vossen, 2013-11-11 This book describes the main objective of EuroWordNet which is the building of a multilingual database with lexical semantic networks or wordnets for several European languages Each wordnet in the database represents a language specific structure due to the unique lexicalization of concepts in languages The concepts are inter linked via a separate Inter Lingual Index where equivalent concepts across languages should share the same index item The flexible multilingual design of the database makes it possible to compare the lexicalizations and semantic structures revealing answers to fundamental linguistic and philosophical questions which could never be answered before How consistent are lexical semantic networks across languages what are the language specific differences of these networks is

there a language universal ontology how much information can be shared across languages First attempts to answer these questions are given in the form of a set of shared or common Base Concepts that has been derived from the separate wordnets and their classification by a language neutral top ontology These Base Concepts play a fundamental role in several wordnets Nevertheless the database may also serve many practical needs with respect to cross language information retrieval machine translation tools language generation tools and language learning tools which are discussed in the final chapter The book offers an excellent introduction to the EuroWordNet project for scholars in the field and raises many issues that set the directions for further research in semantics and knowledge engineering Dogs For Dummies Gina
