Chicago Made Robert Lewis,2009-05-15 From the lumberyards and meatpacking factories of the Southwest Side to the industrial suburbs that arose near Lake Calumet at the turn of the twentieth century manufacturing districts shaped Chicago s character and laid the groundwork for its transformation into a sprawling metropolis Approaching Chicago s story as a reflection of America s industrial history between the Civil War and World War II Chicago Made explores not only the well documented workings of centrally located city factories but also the overlooked suburbanization of manufacturing and its profound effect on the metropolitan landscape Robert Lewis documents how manufacturers attracted to greenfield sites on the city s outskirts began to build factory districts there with the help of an intricate network of railroad owners real estate developers financiers and wholesalers These immense networks of social ties organizational memberships and financial relationships were ultimately more consequential Lewis demonstrates than any individual achievement Beyond simply giving Chicago businesses competitive advantages they transformed the economic geography of the region Tracing these transformations across seventy five years Chicago Made establishes a broad new foundation for our understanding of urban industrial America

**Abolitionizing Missouri** Kristen Layne Anderson, 2016-04-18 Historians have long known that German immigrants provided much of the support for emancipation in southern Border States Kristen Layne Anderson's *Abolitionizing Missouri* however is the first analysis of the reasons behind that opposition as well as the first exploration of the impact that the Civil War and emancipation had on German immigrants ideas about race Anderson focuses on the relationships between German immigrants and African Americans in St Louis Missouri looking particularly at the ways in which German attitudes towards African Americans and the institution of slavery changed over time Anderson suggests that although some German Americans deserved their reputation for racial

egalitarianism many others opposed slavery only when it served their own interests to do so When slavery did not seem to affect their lives they ignored it once it began to threaten the stability of the country or their ability to get land they opposed it After slavery ended most German immigrants accepted the American racial hierarchy enough to enjoy its benefits and had little interest in helping tear it down particularly when doing so angered their native born white neighbors Anderson's work counters prevailing interpretations in immigration and ethnic history where until recently scholars largely accepted that German immigrants were solidly antislavery Instead she uncovers a spectrum of Germans antislavery positions and explores the array of individual motives driving such diverse responses In the end Anderson demonstrates that Missouri Germans were more willing to undermine the racial hierarchy by questioning slavery than were most white Missourians although after emancipation many of them showed little interest in continuing to demolish the hierarchy that benefited them by fighting for black rights

**Cutting Along the Color Line** Quincy T. Mills, 2013-10-09 Today black owned barber shops play a central role in African American public life The intimacy of commercial grooming encourages both confidentiality and camaraderie which make the barber shop an important gathering place for African American men to talk freely But for many years preceding and even after the Civil War black barbers endured a measure of social stigma for perpetuating inequality though the profession offered economic mobility to black entrepreneurs black barbers were obliged by custom to serve an exclusively white clientele Quincy T Mills traces the lineage from these nineteenth century barbers to the bustling enterprises of today demonstrating that the livelihood offered by the service economy was crucial to the development of a black commercial sphere and the barber shop as a democratic social space *Cutting Along the Color Line* chronicles the cultural history of black barber shops as businesses and civic institutions Through several generations of barbers Mills

examines the transition from slavery to freedom in the nineteenth century the early twentieth century expansion of black consumerism and the challenges of professionalization licensing laws and competition from white barbers He finds that the profession played a significant though complicated role in twentieth century racial politics while the services of shaving and grooming were instrumental in the creation of socially acceptable black masculinity barbering permitted the financial independence to maintain public spaces that fostered civil rights politics This sweeping engaging history of an iconic cultural establishment shows that black entrepreneurship was intimately linked to the struggle for equality **The Germans in**

**India** Panikos Panayi,2017-10-04 Based on years of research in libraries and archives in England Germany India and Switzerland this book offers a new interpretation of global migration from the early nineteenth until the early twentieth century Rather than focusing upon the mass transatlantic migration or the movement of Britons towards British colonies it examines the elite German migrants who progressed to India especially missionaries scholars and scientists businessmen and travellers The story told here questions for the first time the concept of Europeans in India Previous scholarship has ignored any national variations in the presence of white people in India viewing them either as part of a ruling elite or more recently white subalterns The German elites undermine these conceptions They developed into distinct groups before 1914 especially in the missionary compound but faced marginalisation and expulsion during the First World War **Migrant City** Panikos

Panayi,2020-04-07 The first history of London to show how immigrants have built shaped and made a great success of the capital city London is now a global financial and multicultural hub in which over three hundred languages are spoken But the history of London has always been a history of immigration Panikos Panayi explores the rich and vibrant story of London from its founding two millennia ago by Roman invaders to Jewish and German immigrants in the Victorian period to the Windrush generation invited from Caribbean countries in the twentieth century Panayi shows how migration has been fundamental to London s economic social political and cultural development Migrant City sheds light on the various ways in which newcomers have shaped London life acting as cheap labour contributing to the success of its financial sector its curry houses and its football clubs London s economy has long been driven by migrants from earlier continental financiers and more recent European Union citizens Without immigration fueled by globalization Panayi argues London would not have become the world city it is today *A Companion to the Gilded Age and Progressive Era* Christopher McKnight
