Ad Astra Matthew Gillett, Katja Grunfeld, Iva Ramuš Cvetkovič, 2025-03-13 Outer space has long been considered the last untouched wilderness However non State actors are increasingly active in space heightening the risk of space pollution Space law designed during the Cold War is State centric and makes inadequate provision for non State actors In the face of this emerging threat this book examines potential avenues of redress in space law including the Outer Space Treaty along with international environmental law international criminal law international humanitarian law and international human rights law It also reviews the national legislation adopted by space faring States at the domestic level In parallel the book examines the deeper theoretical implications addressing non State actor conduct under international law Ultimately it proposes a ground breaking new international law instrument to hold non State actors responsible for space pollution

Yearbook on Space Policy 2012/2013 Cenani Al-Ekabi, Blandina Baranes, Peter Hulsroj, Arne Lahcen, 2015-02-06 The Yearbook on Space Policy is the reference publication analyzing space policy developments Each year it presents issues and trends in space policy and the space sector as a whole Its scope is global and its perspective is European The Yearbook also links space policy with other policy areas It highlights specific events and issues and provides useful insights data and information on space activities The Yearbook on Space Policy is edited by the European Space Policy Institute ESPI based in Vienna Austria It combines in house research and contributions of members of the European Space Policy Research and Academic Network ESPRAN coordinated by ESPI The Yearbook is designed for government decision makers and agencies industry professionals as well as the service sectors researchers and scientists and the interested public *Space in Support of Human Rights* Annette Froehlich, Claudiu Mihai Tăiatu, 2020-01-02 This book stems from the worrying scale and intensity of conflicts humanitarian crises and human rights violations around the world which can be seen in a wide range of global hotspots including Venezuela Yemen Syria Myanmar Sudan Eritrea and numerous others These developments are also relevant for Europe given the large scale migrations they can produce In order to effectively respond to them it has become imperative to analyse ways in which space data and technologies can be used to uphold human rights and monitor violations Various international tribunals such as the International Court of Justice ICJ and the International Criminal Court ICC are increasingly relying on satellite data and especially images when considering human rights violations cases This use of space

related technologies represents a trend that promises to continue as the range and accuracy of space derived data improves Further satellite data has important legal implications because it allows the fulfilment of international obligations to be monitored and offers a powerful tool for dispute resolution Accordingly this book examines the use of satellite images for cases concerning human rights violations since the multitude of humanitarian crises worldwide demonstrate that it is of the utmost importance to analyse how space law policies and space related applications could further support the implementation and monitoring of the observance of human rights thus contributing to enhanced security and sustainable development A range of relevant areas such as migration refugees including settlements and whether they are adequately supplied with basic necessities water distribution and quality housing and settlement monitoring are crucial aspects addressed in this book In closing the use of satellite data for legal purposes is not without its fair share of problems and concerns which are also considered to guide the evolution of this emerging field

Protection of Cultural Heritage Sites on the Moon Annette Froehlich,2020-04-03 This book provides an extensive overview of the protection of cultural heritages sites on the Moon humanity s lunar heritage and the various threats they face First of all the international legal framework especially the relevant space treaties are analyzed in terms of how they protect cultural heritages sites on the Moon In turn the book explores key aspects like the application of customary law the UNESCO World Heritage Convention or the Underwater Convention and the possibility of adding these sites to UNESCO s World Heritage list The book subsequently addresses the question of how to define culture heritage sites or artifacts in particular in view of the Outstanding Universal Value criterion which is a vital aspect in order to differentiate them from space garbage or even space threats Lastly the book proposes and elaborates on various protection systems and multilateral protection regulations Especially now 50 years after the first human landing on the Moon the book is a timely publication that will be of interest to all scholars and professionals working in the space field
