**Feminist Posthumanism in Contemporary Science Fiction Film and Media** Julia A. Empey, Russell J.A. Kilbourn, 2023-08-24 Feminist Posthumanism in Contemporary Science Fiction Film and Media From Annihilation to High Life and Beyond places posthumanism and feminist theory into dialogue with contemporary science fiction film and media This essay collection is intimately invested in the debates around the posthuman and the critical posthumanities within a feminist critical theoretical framework In this posthumanist light science fiction as a genre allows for new imaginings of human technological relations while it can also be the site of a critique of human exceptionalism and essentialism In this way science fiction affords unique opportunities for the scholarly investigation of the relevance and relative applicability of specific posthumanist themes and questions in a particularly rich and wide ranging popular cultural field of production One of the reasons for this suitability is the genre's historically longstanding relationship with the critical investigation of gender specifically the position and relative empowerment of women The original analyses presented here pay close attention to audiovisual style including game mechanics facilitating the critical interrogation of the issues and questions around posthumanism Where typically the mention of SF in the posthumanist context calls to mind a whole set of often clichéd tropes the cyborg technologically augmented bodies AI subjectivities etc this volume's thirteen chapters analyze specific examples of contemporary SF cinema that engage in

meaningful ways with the burgeoning field of critical posthumanism and that utilize such films to interrogate posthumanist and feminist as well as humanistic ideas     STEM and the City Clair Berube,SueAnne McKinney,2025-09-24 STEM and the City second edition is a book that takes the topics of the first edition and brings them into a post Covid educational world Drs Berube and McKinney use their experience in the classroom to reassure teachers especially STEM teachers that despite the current culture wars the children of America still need you     Oceanobs'19: An Ocean of Opportunity. *Assessing the Societal Implications of Emerging Technologies* Evan Michelson,2016-05-12 A growing problem of interest in the field of science and technology policy is that the next generation of innovations is arriving at an accelerating rate and the governance system is struggling to catch up Current approaches and institutions for effective technology assessment are ill suited and poorly designed to proactively address the multidimensional interconnected societal impacts of science and technology advancements that are already taking place and expected to continue over the course of the 21st century This book offers tangible insights into the strategies deployed by well known high profile organizations involved in anticipating

the various societal and policy implications of nanotechnology and synthetic biology It focuses predominantly on an examination of the practices adopted by the often cited and uniquely positioned Project on Emerging Nanotechnologies in the United States as well as being informed by comparisons with a range of institutions also interested in embedding forward looking perspectives in their respective area of innovation The book lays out one of the first actionable roadmaps that other interested stakeholders can follow when working toward institutionalizing anticipatory governance practices throughout the policymaking process

*An Informed Cosmos* Peter S. Williams, 2023-07-14 After a substantial author's preface recounting the author's life journey with the question of science and design in nature *An Informed Cosmos* pulls together essays that jointly cover the core arguments for a scientific theory of intelligent design Along with a foreword by philosopher of science and leading design theorist Stephen C Meyer and a wide range of recommended resources *An Informed Cosmos* offers an informed overview of the contemporary case for intelligent design

**The Politics of Potential** Michelle Pentecost, 2024-01-12 The first one thousand days of human life or the period between conception and age two is one of the most pivotal periods of human development Optimizing nutrition during this time not only prevents childhood malnutrition but also determines future health and potential *The Politics of Potential* examines early life interventions in the first one thousand days of life in South Africa drawing on fieldwork from international conferences government offices health care facilities and the everyday lives of fifteen women and their families in Cape Town Michelle Pentecost explores various aspects of a politics of potential a term that underlines the first one thousand days concept and its effects on clinical care and the lives of childbearing women in South Africa Why was the First One Thousand Days project so readily adopted by South Africa and many other countries Pentecost not only explores this question but also discusses the science of intergenerational transmissions of health disease and human capital and how this constitutes new forms of intergenerational responsibility The women who are the target of first one thousand days interventions are cast as both vulnerable and responsible for the health of future generations such that despite its history intergenerational responsibility in South Africa remains entrenched in powerfully gendered and racialized ways
