Geomorphological Landscapes Of The World:

Geomorphological Landscapes of the World Piotr Migon, 2010-01-22 Physical landscapes are one of the most fascinating facets of our Planet which tell stories about the evolution of the surface of the Earth This book provides up to date information about the geomorphology of the selected classic sites from around the world and shows the variety of geomorphological landscapes as moulded by different sets of processes acting over different timescales from millions of years to days The volume is written by nearly fifty geomorphologists from more than twenty countries who for many years have researched some of the unique sceneries on the planet The thirty six chapters present each continent of the world They describe landscapes of different origin so that the reader can learn about the complexity of processes behind the sceneries This is a useful reference book linking geomorphology with global initiatives focused on nature conservation

Geomorphological Landscapes of the World ,2011-07-14 Landscapes and Landforms of England and Wales

Andrew Goudie, Piotr Migoń, 2020-05-10 This book presents the geomorphological diversity of England and Wales These regions are characterised by an extraordinary range of landforms and landscapes reflecting both the occurrence of many different rock types and drastic climatic changes over the last few million years including ice sheet expansion and decay The book begins by providing the geological and geomorphological context needed in order to understand this diversity in a relatively small area In turn it presents nearly thirty case studies on specific landscapes and landforms all of which are landmarks in the territory discussed These include the famous coastal cliffs and landslides granite tors of Dartmoor formerly glaciated mountains of Snowdonia and the Lake District karst of Yorkshire and many others The geomorphology of London and the Thames is also included Providing a unique reference guide to the geomorphology of England and Wales the book is lavishly illustrated with diagrams colour maps and photos and written in an easy to read style The contributing authors are distinguished geomorphologists with extensive experience in research writing and communicating science to the public The book will not only be of interest to geoscientists but will also benefit specialists in landscape research geoconservation tourism and environmental protection *Geoheritage* Emmanuel Reynard, José Brilha, 2017-12-05 For the last 20 years there has been a growing interest in the geosciences for topics related to geoheritage geoconservation geotourism and geoparks Geoheritage Assessment Protection and Management is the first and only reference book to cover these main topics as well as the relationship of geoheritage to other subjects such as landscapes conservation and tourism The book also includes methodologies for assessment mapping and visualisation along with case studies and colour images of some of the most important global geosites This book is an essential resource for geoscientists park and geopark managers tourism and regional planning managers as well as university students interested in geoheritage geosites geomorphosites geoconservation and geotourism It also includes critical information on UNESCO s Global Geoparks World Heritage and Biosphere Reserve sites national parks and protected areas in general land use planning and nature conservation policies

and in the general contribution of geodiversity for sustainable development Winner of the 2019 AESE Award for Outstanding Publication Written by a panel of 46 authors from 14 countries in all continents Based on conceptual methodological and applied research carried out by academics and practitioners Includes 160 colour images and maps of geoheritage sites

Features six case studies from sites in Africa Asia Australia Europe North America and South America **Great Warm Deserts of the World** Andrew Goudie,2002 This is the first ever regional study of the geomorphology of the world s deserts demonstrating why different deserts have special landscape features and land forming processes It explains the climatic and tectonic history of deserts showing how the histories of the deserts have been long and complex and how they have responded to global changes in climate particularly over the course of the last few millions of years Each of the major warm deserts of the world is treated in detail and the book is extensively illustrated with numerous plates and figures A large and comprehensive bibliography provides a guide to the international literature Landscapes and Landforms of Switzerland

Emmanuel Reynard,2020-07-09 This book provides a comprehensive overview of the Landscapes and Landforms of Switzerland It covers the country s geological and tectonic context together with its climatic context geomorphological history structural and karstic landscapes glacial and periglacial landscapes landscapes with natural hazards geomorphology and society and the preservation of its geomorphological heritage Richly illustrated it presents case studies on some of the country s most famous natural sites including the Matterhorn Aletsch Glacier Sardona Tectonic Arena and Engadine among others Landscapes and Landforms of Turkey Catherine Kuzucuoğlu,Attila Çiner,Nizamettin Kazancı,2019-01-08 This book on Turkish geomorphology offers location descriptions based on their dynamics and evolution processes including hydrology tectonics volcanism slopes coasts ice snow and wind It presents landforms as a result of evolution Quaternary Holocene historic and in relation to the elements determining and or impacting this evolution vegetation soil hydrology geology climate sea level and human action as well as the resulting landscapes Richly illustrated with pictures from each site including geomorphological maps and sections it explains the risks associated with the geomorphological dynamics on local and global scales natural and or cultural heritage archaeology prehistory history architectural specifications adapted to the landscape as well as challenges for human society endangered landscape protection conservation rules statutes posters paintings

Landscapes and Landforms of Italy Mauro Soldati,Mauro Marchetti,2017-05-23 The book deals with the most striking landscapes and landforms of Italy Attention is given to landform diversity and landscape evolution through time which has been controlled by very diverse geological conditions and dramatic climate changes that have characterized the Italian peninsula and islands since the end of the last glaciation In addition various examples of human impact on the landscape are presented Landscapes and Landforms of Italy contains more than thirty case studies of a multitude of Italian geographical landmarks The topics and sites described in this book range from the Alpine glaciers to the Etna and Vesuvius volcanoes taking into account the most representative fluvial coastal gravity induced karst and structural landscapes of the country

Chapters on the geomorphological landmarks of the cities of Rome and Venice are also included The book provides the readers with the opportunity to explore the variety of Italian landscapes and landforms through informative texts illustrated with several color maps and photos This book will be relevant to scientists scholars and any readers interested in geology physical geography geomorphology landscape tourism geoheritage and environmental protection

Landscapes and Landforms of the Central Sahara Jasper Knight,Stefania Merlo,Andrea Zerboni,2024-01-02 This book describes the Central Sahara region bringing together an unprecedented combination of diverse and often historic research published in different languages in order to describe its varied landscapes and landforms The Central Sahara region consists of Libya Algeria Mali Niger and Chad countries that share similar landscape histories and common landscape traits including massifs sand seas paleowater features and large depressions Furthermore human settlement of this region goes hand in hand with climate and environmental changes and landscape evolution during the Holocene and earlier hence Central Saharan landscapes and landforms provide valuable insights into landscape human relationships over long timescales The book offers a comprehensive yet accessible reference source drawing on both past and present interdisciplinary research and gathering the insights of authors from many different countries to explore a region that has largely been overlooked in available literature

Climate and Anthropogenic Impacts on Earth Surface Processes in the Anthropocene Achim Beylich,Daniel Vázquez Tarrío,Dongfeng Li,Marc Oliva,Mario Morellón Marteles,2024-10-03 Climate and Anthropogenic Impacts on Earth Surface Processes in the Anthropocene outlines our current understanding of the effects of ongoing and accelerated environmental changes on Earth surface processes and details the systematic and quantitative methodology on the actual drivers of these processes This book covers various geomorphological process domains and a wide range of terrestrial surface environments on Earth It provides a broad spectrum of advanced techniques and methods of data collection and generation together with various approaches and methods of data analysis and geomorphologic modelling This book is a valuable resource for upper level undergraduates graduates and academics studying Earth surface processes as well as researchers and professionals in needing a comprehensive overview of Earth surface process change and influence during the Anthropocene Comprehensively covers climatic and anthropogenic drivers of earth surface processes including detection and quantification techniques Includes the latest research and suggestions for adapted and sustainable mitigation and management strategies Includes worked examples and case studies of anthropogenic and climate influences on Earth surface processes

Landscapes and Landforms of Western Canada Olav Slaymaker,2016-12-01 This is the only book to focus on the geomorphological landscapes of Canada West It outlines the little appreciated diversity of Canada s landscapes and the nature of the geomorphological landscape which deserves wider publicity Three of the most important geomorphological facts related to Canada are that 90% of its total area emerged from ice sheet cover relatively recently from a geological perspective permafrost underlies 50% of its landmass and the country enjoys the benefits of having three oceans as its

borders the Arctic Pacific and Atlantic oceans Canada West is a land of extreme contrasts from the rugged Cordillera to the wide open spaces of the Prairies from the humid west coast forests to the semi desert in the interior of British Columbia and from the vast Mackenzie river system of the to small steep cascading streams on Vancouver Island The thickest Canadian permafrost is found in the Yukon and extensive areas of the Cordillera are underlain by sporadic permafrost side by side with the never glaciated plateaus of the Yukon One of the curiosities of Canada West is the presence of volcanic landforms extruded through the ice cover of the late Pleistocene and Holocene epochs which have also left a strong imprint on the landscape The Mackenzie and Fraser deltas provide the contrast of large river deltas debouching respectively into the Arctic and Pacific oceans

Landscapes and Landforms of Namibia Andrew Goudie, Heather Viles, 2014-10-15 The landscapes of Namibia are of world class quality in beauty diversity and interest This book provides the first ever overview of the most important of these landscapes explains why they look as they do and evaluates why they are of note Writing from a geomorphological perspective the authors introduce the key processes and controls which influence landscape and landform development in Namibia Geological and tectonic background climate now and in the past vegetation and animals including humans are all identified as crucial factors influencing the landscape of Namibia today The book presents twenty one richly illustrated case studies of the most significant landscapes of Namibia ranging from the iconic Etosha Pan at the heart of the biggest wildlife conservation area in the north to the famous dunes and ephemeral river at Sossus Vlei in the heart of the Namib desert Each case study also contains a full list of the key references to the scientific work on that landscape The authors provide an assessment of the current state of conservation of these landscapes and their importance to tourism The book is recommended reading for anyone with a professional or amateur interest in the spectacular and intriguing landscapes of this part of southern Africa It provides a useful handbook for those travelling around Namibia and an invaluable reference guide for those interested in how landscapes develop and change

The Biology of Deserts David Ward, 2016-08-25 This book offers a concise but comprehensive introduction to desert ecology and adopts a strong evolutionary focus As with other titles in the Biology of Habitats Series the emphasis in the book is on the organisms that dominate this harsh environment although theoretical and experimental aspects are also discussed In this updated second edition there is a greater focus on the effects of climate change and some of its likely effects on deserts seeing desertification as among the most serious results of climate change leading ultimately to the increasing size of arid and semi arid regions The Biology of Deserts Second Edition includes a wide range of ecological and evolutionary issues including morphological and physiological adaptations of desert plants and animals species interactions the importance of predation and parasitism food webs biodiversity and conservation It features a balance of plant and animal both invertebrate and vertebrate examples and also emphasizes topical applied issues such as desertification and invasive species The book concludes by considering the positive aspects of desert conservation This accessible textbook is intended for senior undergraduate and graduate

students as well as professional ecologists conservation practitioners and resource managers working in the field of desert ecology *Landscapes and Landforms of Austria* Christine Embleton-Hamann,2022-05-20 This book intends to identify and publicize the unique features of Austrian geomorphology In a country which stretches from the core of the European Alps to the Hungarian plain there is huge variety of landforms and landscapes This book reveals that variety Part 1 sets the context of the Austrian landscape as a whole Part 2 is the core of the volume and comprises a careful selection of the most outstanding landscapes in Austria Each of the chapters results from detailed research conducted by an author over many years Austria s landscapes are especially attractive because of the great variety of topographic slopes geologic foundations and the special landscape legacy from the Quaternary period Glacial and Karst landscapes dominate but there are superb examples of granite weathering landscapes and geologically recent volcanism The book is lavishly illustrated with about 350 color images and is securely based on scientific scholarship *Landscapes and Landforms of Brazil* Bianca Carvalho

Vieira,André Augusto Rodrigues Salgado,Leonardo José Cordeiro Santos,2015-03-05 This book presents Brazil as a country of continental dimensions Its territory has a large variety of rock types geological structures and climates The country has a large variety of landscapes such as the humid plains of the Amazon River the dry plateaus of the semi arid region or the subtropical mountains of the southern region On the coast some plateaus and mountains like the Serra do Mar Mountain range formed a significant barrier front to access the hinterland of Brazil On the other side of these coastal plateaus and mountains there is a large collection of other plateaus mountains plains and depressions little altered by human interference Thus Brazil has a unique variety of different landscapes and extraordinary geomorphological sites The book invites readers to learn more about the beautiful Brazilian landscapes their complexity and vastness **Landscapes and Landforms of the**

Horn of Africa Paolo Billi,2022-09-30 This book focuses on regions for which until now the geomorphology was very poorly studied and relatively unknown Nevertheless the landforms and landscapes of the Horn of Africa are highly attractive diverse and in a few cases unique since they span very different environments from highland plateaus and mountains to lowlands even below sea level and coastlines with a high degree of diversity and from monsoon to arid climate conditions The main topics addressed in the book include the links between the geological evolution and the current large scale geomorphology of the Horn of Africa the large differences between the highlands and lowlands climate river hydrology and their variation through time within a climate change perspective This part of the world was home of the very first hominids The landscape in which they lived and evolved throughout the Pleistocene is described in comparison with the arid and inhospitable though immensely scenic environment of today Perennial and ephemeral rivers with very different morphology processes and hydrology drain the area and in combination with the past and recent uplift substantially contributed to provide the region with peculiar landscapes and landforms Long lasting weathering and erosion processes result in a typical inselberg landscape such as the Bur region or the currently exposed flatland of old peneplain surfaces Their changes through time

induced by both natural and anthropogenic factors are addressed by a couple of case studies Though the region has few inhabitants they had to struggle to find their livelihood in a land that offers poor resources This resulted in landscape change and land degradation Examples of human impact on the landscape are presented at different scales This book provides readers interested in geography and geomorphology with essential scientific and educational information on the Landscapes and Landforms of Eritrea Djibouti and Somalia through simple though scientifically rigorous texts illustrated with several color maps and photos One main prerogative of this book is therefore to give an insight into a region of the world where for geographical and historical constraints geomorphological investigation was very limited thus enriching its intrinsic informative value

Landscapes and Landforms of Norway Achim A. Beylich, 2020-10-04 This book discusses the striking geomorphological landscapes of mainland Norway As part of the Springer book series on World Geomorphological Landscapes it outlines the nature and diversity of Norway's geomorphological landscapes and examines the geological background and the drivers of landscape evolution It also features numerous case studies describing the most striking sites and offers insights into the status and value of geoheritage and geoconservation in the country Providing readers with an opportunity to explore the variety of Norwegian landscapes and landforms through informative texts richly illustrated with color maps and photos the book will appeal to scientists scholars and any readers interested in geology physical geography geomorphology landscape tourism geoheritage and environmental protection

Landscapes and Landforms of Israel Amos Frumkin, Nurit Shtober-Zisu, 2024-03-19 This edited book will bring together a collection of works that comprehensively address the various landforms of Israel and how their evolution has been shaped over time by multiple geomorphic agents Israel is a small country with highly diverse landscapes and climates this overview of the most prominent landscapes will describe the processes origins and the environmental significance of those landscapes The sites described in this book include lowlands to mountains the rift valley and desert to Mediterranean zones along with long term interactions between their geomorphology and people which largely contributed to modern landscapes The book will be relevant to those interested in the geology physical geography and history of Israel and the processes that shaped its unique landscapes

Granite Landscapes of the World Piotr Migoń, 2006-01 Outcrops of granitic rocks cover a large proportion of the Earth's surface and host a range of spectacular landforms and landscapes from extensive plains dotted by inselbergs to deeply dissected mountain ranges They are often strikingly beautiful but more importantly they provide valuable insights into the mechanisms of geomorphic evolution both in the past and at present The book offers a comprehensive view of the geomorphology of granite areas examining individual landforms and their assemblages Weathering processes and the phenomenon of deep weathering in particular are given much emphasis as these are fundamental to the understanding of the geomorphic evolution of granite areas Granite landforms directly related to weathering such as boulders tors inselbergs and features of surface microrelief are examined in respect to their characteristics and origin Patterns of slope evolution are

shown in the context of both rock slopes and deeply weathered terrains Granite geomorphology in the coastal periglacial and glacial context is presented to show how the characteristics of granite control landform evolution in these specific environments In the closing part a variety of geological controls is reviewed and their primacy over other factors is advocated followed by an attempt to provide a typology of natural granite landscapes Finally certain specific ways of human transformation of granite landscapes are presented The book will be useful to a range of earth science disciplines including geomorphology igneous petrology engineering geology and soil science Cultural geographers and people dealing with conservation of geological heritage should find it of interest Examples from all parts of the world and extensive referencing ensure that it will act as an up to date guidebook to the fascinating world of granite geomorphology *Earth's Landscape* Joyce A. Quinn, Susan L. Woodward, 2015-02-03 This unusual encyclopedia brings together in depth information on more than 450 natural geographic features from around the world and offers an array of creative tools to promote critical thinking and classroom discussion With Earth undergoing rapid environmental change students and the general public alike should be knowledgeable about the world's geographic features This authoritative two volume reference enables readers do just that It describes continents and oceans individual mountains islands caves and rivers and ecological entities such as wildlife refuges and national parks Each entry provides a geographic overview of the feature's significance location description geologic history biota protected areas and environmental issues But the coverage goes even deeper so that entries also discuss the cultural importance of each natural place covering everything from indigenous beliefs to traditional folklore to contemporary legends The encyclopedia stands apart from other works not only in the depth of its coverage but also in its range It discusses lesser known as well as prominent geographical features and offers critical thinking aids that will help students see how the natural world relates to their daily lives Teaching and learning tools include an appendix called Opposing Viewpoints that allows students to understand landforms involved in current conflicts and disputes as well as an Activities Discussion Questions appendix
