Small Mammal Care Guide RD King, What You Need To Know About Taking Care Of Small Mammals, Get All The Support And Guidance You Need To Be A Success At Caring For Small Mammals. Have you been thinking of bringing a new pet into your family? If you have, do you realize that it does not have to be something big like a dog? You can also have the option of going with a smaller mammal. A few examples would be a gerbil or a hamster or maybe even a rabbit or a rat. One common reason people choose smaller mammals as a pet is if they are restricted with the amount of space they have for a pet. A prime example would be something living in a small apartment in the inner city. Chances are that there would not be enough room in the apartment for a dog to be comfortable and have room to play. On top of that, it can be a real hassle walking a dog up and down stairs to take them outside and some dogs will require training to be able to walk in the city without problems. Training can be costly and the entire experience of having a dog in a small apartment can be full of hassles, so in this situation, it is probably better to go with a smaller pet. If your children have been begging you for a pet, you might want to start out with a smaller animal. Fish can be boring and children can lose their interest and forget about them in no time. At the same time, a dog can be way too much responsibility for a child, especially if they are young and it is their first pet. The perfect option for a child as their first pet would be an animal such as a hamster or gerbil.
