Figuring Out Fluency - Addition and Subtraction With Whole Numbers John J. SanGiovanni, Jennifer M.

Bay-Williams, Rosalba Serrano, 2021-07-27 Because fluency practice is not a worksheet Fluency in mathematics is more than adeptly using basic facts or implementing algorithms It is not about speed or recall Real fluency is about choosing strategies that are efficient flexible lead to accurate solutions and are appropriate for the given situation Developing fluency is also a matter of equity and access for all learners The landmark book Figuring Out Fluency in Mathematics Teaching and Learning offered educators the inspiration to develop a deeper understanding of procedural fluency along with a plethora of pragmatic tools for shifting classrooms toward a fluency approach Now teachers have the chance to apply that inspiration through explicit instruction and practice every day with the classroom companion Figuring Out Fluency Addition and Subtraction with Whole Numbers With this book teachers can Dive deeper into the Significant Strategies for fluency explained in the anchor book Learn how these strategies grow from and relate to the basic fact strategies children learn Access over 100 strategy aligned and classroom ready activities for fluency instruction and practice in adding and subtracting multi digit whole numbers including worked examples routines games and centers Find activities for assessing all components of addition and subtraction fluency plus support for engaging families Download all of the needed support tools game boards and other resources from the companion website for immediate implementation Give each and every student the knowledge and power to become skilled and confident mathematical thinkers and doers *How to Add and Subtract, Grade 1* Mary

Rosenberg, 2000 Presents comprehensive overview of addition and subtraction of whole numbers to be used in classrooms or at home **Dynamic Learning Spaces in Education** Veena Kapur, Sudipta Ghose, 2018-08-14 This volume discusses the

need for a major paradigm shift in educational practice in the current digital and globalized world It establishes a bridge between theory and praxis and revisits the objectives of learning and its modalities within the context of a rapidly evolving global world order This volume includes perspectives from different countries on creating a dynamic and adaptive education system that encourages creativity leadership flexibility and working in virtual as well as inclusive environments The four sections include chapters that discuss creating meaningful learning environments preparing teachers for new age classrooms the digital learning space fostering change in classrooms and importantly also includes cases and experiments from schools The authors are teacher educators teachers and researchers and each chapter while being deeply rooted in theory is juxtaposed with informed practice making the suggestions easy to implement in different settings This is an important resource for researchers and practitioners associated with education systems in creating engaging meaningful and future ready education practices Let us understand Mathematics-Class 2 Harinder Mahajan, 2021-07-17 This is the second of a

series of books based on the NCERT syllabus and research on the teaching of mathematics The focus here is on an understanding of concepts and procedures The concepts and procedures are presented by manipulatives pictures real world

situations spoken and written words and symbols and videos that enhance their learning Opportunities are provided for communication translation from one mode to another and applications to daily life The teachers should use manipulatives that are commercially available or can be made and use situations for exercises that are familiar to the children in the class As most of the schools in India have a paucity of resources we will use sticks for activities with number concepts The sticks can be replaced by an abacus or base ten blocks The schools that can afford should provide materials such as counters Al abacus pattern blocks geometrical models geoboards fake money and use these for explaining concepts and procedures If the schools students cannot afford these teachers can make models of different 2 D and 3 D shapes using cardboard and use dot paper instead of Geoboard The students can be asked to bring buttons scissors and empty boxes containers of different shapes and sizes from home All children should at least have 100 sticks of the same length and rubber bands they can buy pop sticks or toothpicks and dot paper As for most teachers the textbook is the curriculum This book is a teaching guide cum workbook for students As the children have not yet developed the reading skills the concepts operations and word problems should be learnt and tested orally first The exercises with manipulatives and oral work are included to facilitate that Some activity sheets are also provided that can be printed and used by students
