genre has emerged pathography the personal narrative concerning illness treatment and sometimes death Hawkins's sensitive reading of numerous pathographies highlights the assumptions attitudes and myths that people bring to the medical encounter One factor emerges again and again in these case studies the tendency in contemporary medical practice to focus primarily not on the needs of the individual who is sick but on the condition that we call disease Pathography allows the individual person a voice one that asserts the importance of the experiential side of illness and thus restores the feeling thinking experiencing human being to the center of the medical enterprise Recommended for medical practitioners the clergy caregivers students of popular culture and the general reader *Reconstructing Illness* demonstrates that only when we hear both the doctor's and the patient's voice will we have a medicine that is truly human *Silicone Survivors* Susan M. Weisse, 2024-09-03 Travis A. Weisse tells a new history of modern diets in America that goes beyond the familiar narrative of the nation's collective failure to lose weight By exploring how the popularity of diets grew alongside patients' frustrations with the limitations and failures of the American healthcare system in the face of chronic disease Weisse argues that millions of Americans sought fad diets such as the notorious Atkins program which ushered in the low carbohydrate craze to wrest control of their health from pessimistic doctors and lifelong pharmaceutical regimens Drawing on novel archival sources and a wide variety of popular media Weisse shows the lengths to which twentieth century American dieters went to heal themselves outside the borders of orthodox medicine and the subsequent political and scientific backlash they received Through colorful profiles of the leaders of four major diet movements *Health Freaks* demonstrates that these diet gurus weren't shady snake oil salesmen preying on the vulnerable rather they were vocal champions for millions of frustrated Americans seeking longer healthier lives *Facing Cancer* Theodore A.
