Rationality and Legality of Non-market Economy Treatment in Antidumping Law Shao Long, 2024-01-03. This book serves as a comprehensive study of and provides rich insight into non-market economy treatment, including its past, present, and estimated future practices and implications. It explores the introduction of the market and non-market economy dichotomy into international trade law. It traces the origin and development of non-market economy treatment against changing international economic and political background. The book examines this treatment in light of the rationale underlying anti-dumping, reflecting its alleged significance of ensuring fair trade. It, in particular, investigates the varied non-market economy treatment practices responding to concerns of China's rising as a large state-led economy, analyzing the deviation of NME treatment into an all-in trade tool. The book argues against preconceived bias and unilateral protectionism. It highlights the universal existence of government involvement in the market and proposes objective assessment of its impact on fair trade. The final proposition of the book is depoliticizing trade reforming comprehensively international trade rules to carefully calibrate different values, including promoting fairness and enhancing global social welfare. It envisages a multi-dimension overhaul of international trade rules to rebalance trade interests rather than roughly labeling an economy to confer different treatment, the practices of which lead to separation and chaos. The book is of particular relevance and interest to economies in transition and among policy makers, academicians, and legal practitioners engaged in trade remedies and trade rules reconstruction.

Constitution of Imperium Ronnie D. Lipschutz,2015-12-03 The title of this book is a play upon several important concepts and forces in the ongoing debate about American empire Since September 11 2001 the Bush administration and its counsels in the U S Department of Justice have been both constituting an empire of American hegemony and in so doing violating the spirit and the law of the American

Constitution at home and abroad The U S Constitution has been doing work in the nonsovereign spaces of Guantanamo Bay Cuba Abu Ghraib Baghdad and CIA black detention sites around the world The reach of this constitution is becoming visible in National Security Agency surveillance and data mining of electronic communications between the United States and the rest of the world and in a myriad of other regulatory and legal demands made by the United States both of its citizens and of those living in and traveling among other countries And in testing the limits of its wished for powers the Bush administration seeks to constitute an imperium that by its own definition would be nowhere subject to the long assumed checks of either the U S Constitution Congress the courts or international law for it operates outside of the boundaries of American sovereignty in defiance of the international community and the United Nations and in violation of the law of nations This book is the latest and perhaps sharpest entry in the burgeoning literature of American empire since Hardt and Negri Its focus on the legal and institutional aspects of empire sets it apart from the literature on this subject
