At last we've arrived at the final step in the chemical process. *Reactions* begins with a recap of elements and molecules and then goes on to explain the concepts that characterize a chemical reaction including energy, entropy, and time. Gray introduces us to his favorite reactions from those characterized by ignition and explosion to photosynthesis to *The Boring Chapter* in which he dives deep into reactions like paint drying, grass growing, and water boiling. *Reactions* is the spectacular finale of the three act chemical drama that Gray has illustrated for us over the years in his engaging, entertaining, and inimitable way.
