*Don't Be a Penguin* Nish Bey, 2012-10-01 How does peeing all over a toilet seat in a public restroom help our economy Why did I deliver a case of cream cheese to a food bank Why do I wash my hands before going to the bathroom instead of after Why did I spend an entire family vacation fighting with the FDA over the number of servings in a can of PAM This book will be answering these important questions and will be telling you the tales of America's top free thinker Or maybe America's biggest idiot Either way if you are looking for a self help book on how to become a more productive member of our society this book is not for you However if you want to start living your life like an intelligent alien and end the days of waddling around like a penguin following everyone else then this book will change your life forever **You Are Not So Smart** David McRaney, 2011-10-27 An entertaining illumination of the stupid beliefs that make us feel wise based on the popular blog of the same name Whether you're deciding which smartphone to purchase or which politician to believe you think you are a rational being whose every decision is based on cool detached logic But here's the truth You are not so smart You're just as deluded as the rest of us but that's okay because being deluded is part of being human Growing out of David McRaney's popular blog *You Are Not So Smart* reveals that every decision we make every thought we contemplate and every emotion we feel comes with a story we tell ourselves to explain them But often these stories aren't true Each short chapter covering topics such as Learned Helplessness Selling Out and the Illusion of Transparency is like a psychology course with all the boring parts taken out Bringing together popular science and psychology with humor and wit *You Are Not So Smart* is a celebration of our irrational thoroughly human behavior *The Zoologist's Guide to the Galaxy* Arik Kershenbaum, 2022-03-15 A wildly fun and scientifically sound exploration of what alien life must be like Scientists are confident that life exists elsewhere in the universe Yet rather than taking a realistic approach to what aliens might be like we imagine that life on other planets is the stuff of science fiction The time has come to abandon our fantasies of space invaders and movie monsters and place our expectations on solid scientific footing Using his own expert understanding of life on Earth and Darwin's theory of evolution which applies throughout the universe Cambridge zoologist Dr Arik Kershenbaum explains what alien life must be like how these creatures will move socialize and communicate Might there be an alien planet with supersonic animals A moon where creatures have a language composed of smells Will aliens scream with fear act honestly or have technology *The Zoologist's Guide to the Galaxy* answers these questions using the latest science to tell the story of how life really works on Earth and in space *Battleground* Terry A. key has its own teaching and are designed to provide a deep intrapsychic activation and healing Following over 15 years of research and experience Marie brings a light hearted down to earth and humorous multidimensional framework to how we view sanity

**Great Stories Don't Write Themselves** Larry Brooks,2019-11-12 One of the most common questions new writers ask professionals is how they wrote their book what was their process for storytelling Did they use an outline to plan the book or write it from the seat of their pants But really the question should be about the general principles and nature of storycraft does every part of a story have what it needs to keep readers turning the pages Bestselling author and creator of StoryFix com Larry Brooks changes the sound of the writing conversation by introducing a series of detailed criteria for novelists of every level and genre to refer to while writing regardless of their preferred writing method Beginning with the broadest part of the story the early checklists help writers to ensure that their novel is based on a premise rather than an idea and gradually hones in on other elements to keep the story moving forward including dramatic tension narrative strategy scene construction Readers won't know or care about the process But what Brooks offers here is a chance for readers to make the most of whichever process they choose and in doing so cut years off their learning curve
