Greenfeld,2015-08-04 Excerpt from Probe Programming Users Manual Nyu Machining Cell This users manual describes the  
concepts and operation of a touch probe on a machine tool using cadcam programming techniques The system was  
developed as a component in the autonomous machining cell project in New York University The basic concept of the system  
is in cycle gauging of machined and pre machined parts with the machine tool serving in the function of a coordinates  
measurement machine the advantage being production and inspection on the same machine with the same setup The system  
enables the design of a probing cycle on the cadcam model of the part the execution of the probing cycle and the preparation  
of quality inspection reports A special feature is the ability to localize a misaligned part using sparse point data supplied by  
the probe The system is intended for use by students and research staff at the NYU Robotics Laboratory and may also serve  
as an outline for future implementation of new applications involving the use of the programming tools and techniques  
associated with the machining cell About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic
