Dilemmas Michael Jackson,2024-11-12 The ingenious ways dilemmas are addressed in non Western traditions Dilemmas explores some of the most pressing existential problems of our times from climate change political conflict and social injustice to balancing one s own needs against those of others Pushing back against the tendency to think of dilemmas as clear cut binary choices renowned anthropologist Michael Jackson shows us some of the ingenious ways that dilemmas are addressed in non Western thought and oral traditions as well as in Western philosophy Drawing on examples from myth literature and his extensive ethnographic fieldwork in West Africa and Aboriginal Australia each of thirteen chapters examines a particular dilemma and how it is experienced circumvented or reimaged From the struggles of the Aboriginal people of Central Australia for land rights to Walter Benjamin s harrowing journey across the Pyrenees as he fled German occupied France in 1940 from the story of a suburban family in Aotearoa New Zealand adjusting to life in a commune to the dilemmas of migrants from the Global South trying to reconcile their search for a better life with their longing for home Jackson interweaves philosophical reflections insights from his anthropological fieldwork and individual life stories In striking a balance between our contradictory impulses to be both apart from and together with others Jackson makes a case against identitarian essentialism showing us how the oppositional thinking through which we often frame our contemporary dilemmas may be overcome *Unthinking Modernity* Judith Stamps,1995-01-18 Like their European contemporaries Innis and McLuhan worked toward a theory of how westerners have developed classifications through which they perceive the world Moreover Stamps shows that they used insights derived from their North American experience to add a new media based perspective to such a theory Unthinking Modernity offers unique perspectives on the ways in which economics politics and media intertwine to create personal and social consciousness **Motivation, Emotion, and Goal Direction in Neural Networks** Daniel S. Levine,Samuel J. Leven,2014-01-14 The articles gathered in this volume represent examples of a unique approach to the study of mental phenomena a blend of theory and experiment informed not just by easily measurable laboratory data but also by human introspection Subjects such as approach and avoidance desire and fear and novelty and habit are studied as natural events that may not exactly correspond to but at least correlate with some known or unknown electrical and chemical events in the brain The Relationship of Verbal and Nonverbal Communication Mary R.

Microscopy, Magnification and Modernist Fiction Patrick Armstrong,2024-12-26 Exploring how modernism registered shock experiences of the microscopic and extended vision in prose fiction through the work of four modernist writers D H Lawrence Marcel Proust Virginia Woolf and Samuel Beckett this book is the first substantial study of the interrelations between microscopy and modernist fiction Illustrating ways in which optical instruments had the capacity to change displace and reframe ideas of what the world is like this book argues that encounters with the microscopic are often depicted as thresholds between the human and the non human in ways that reverberate through modernist fiction Exploring a period of significant developments in microscopical tools and techniques from the light microscope to the electron microscope this book traces a shift that reconfigured the limits of the observable *Pragmatism and the Forms of Sense* Robert E.

Innis,2010-11-01 Making sense of the world around us is a process involving both semiotic and material mediation the use of signs and sign systems preeminently language and various kinds of tools technics As we use them we experience them subjectively as extensions of our bodily selves and objectively as instruments for accessing the world with which we interact Emphasizing this bipolar nature of language and technics understood as intertwined forms of sense Robert Innis studies the multiple ways in which they are rooted in and transform human perceptual structures in both their individual and social dimensions The book foregrounds and is organized around the notion of semiotic embodiment Language and technics are viewed as probes upon which we rely in which we are embodied and that themselves embody and structure our primary modes of encountering the world While making an important substantive contribution to present debates about the biasing of perception by language and technics Innis also seeks to provide a methodological model of how complementary analytical resources from American pragmatist and various European traditions can be deployed fruitfully in the pursuit of new insights into the phenomenon of meaning making Maybe Teaching is a Bad Idea Larry D. Spence,2023-07-03 Deep and lasting

learning results when we teach human brains in ways responsive to how they re structured and how they function which is not how we imagine they work or wish they would work This book proposes a radical restructuring of teaching so that it conforms to how people learn Spence maintains that teaching cannot and should not be aimed at transferring knowledge from teacher brains into student brains In his words Decades of experience have made perfectly clear that this approach frustrates teachers bores students and results in minimal learning This is a book that challenges it will poke and prod your thinking The author writes near the end of Chapter 4 I wanted to write a book that asked real questions and explored possible answers I am not concerned that you agree with my answers or ideas but I fervently hope the questions I m raising will lead you to questions about habitual teaching practices and the resulting failure of students to learn **This Could Be Our Future** Yancey Strickler,2019-10-29 A vision for building a society that looks beyond money and toward maximizing the values that make life worth living from the cofounder of Kickstarter Western society is trapped by three assumptions 1 That

the point of life is to maximize your self interest and wealth 2 That we re individuals trapped in an adversarial world and 3 That this is natural and inevitable These ideas separate us keep us powerless and limit our imagination for the future It s time we replace them with something new This Could Be Our Future is about how we got here and how we change course While the pursuit of wealth has produced innovation and prosperity it also established an implicit belief that the right choice in every decision is whichever option makes the most money The answer isn t to get rid of money it s to expand our concept of value By assigning rational value to other values besides money things like community purpose and sustainability we can refocus our energies to build a society that s generous fair and ready for the future By recalibrating our definition of value a world of scarcity can become a world of abundance Hopeful but firmly grounded full of concrete solutions and bursting with creativity This Could Be Our Future brilliantly dissects the world we live in and shows us a road map to the world we are capable of making

The Orphic Voice Elizabeth Sewell,2022-05-03 A wondrously written book of literary criticism and philosophy that maps the relationship between poetry and natural history connecting verse from poets such as Shakespeare and Rainer Maria Rilke to the work of scientists and theorists like Francis Bacon and Michael Polanyi Taking its bearings from the Greek myth of Orpheus whose singing had the power to move the rocks and trees and to quiet the animals Elizabeth Sewell s *The Orphic Voice* transforms our understanding of the relationship between mind and nature Myth Sewell argues is not mere fable but an ancient and vital form of reflection that unites poetry philosophy and natural science Shakespeare with Francis Bacon and Giambattista Vico Wordsworth and Rilke with Michael Polanyi All these members of the Orphic company share a common perception that discovery in science and poetry is a mythological situation in which the mind unites with a figure of its own devising as a means toward understanding the world Sewell s visionary book first published in 1960 presents brilliantly illuminating readings of A Midsummer Night s Dream and Rilke s Sonnets to Orpheus among other masterpieces while deepening our understanding not only of poetry and the history of ideas but of the biological reach of the mind

The Big Switch: Rewiring the World, from Edison to Google Nicholas Carr,2009-01-19 Magisterial Draws an elegant and illuminating parallel between the late 19th century electrification of America and today s computing world Salon Hailed as the most influential book so far on the cloud computing movement Christian Science Monitor The Big Switch makes a simple and profound statement Computing is turning into a utility and the effects of this transition will ultimately change society as completely as the advent of cheap electricity did In a new chapter for this edition that brings the story up to date Nicholas Carr revisits the dramatic new world being conjured from the circuits of the World Wide Computer

The Oxford Handbook of Cognitive Archaeology Thomas Wynn,Karenleigh Overmann,Frederick Coolidge,2024-03-27 The Oxford Handbook of Cognitive Archaeology is a landmark publication showcasing the theories methods and accomplishments of archaeologists who investigate the human mind including its evolutionary development its ideation thoughts and beliefs and its very nature through material forms The volume encompasses the wide spectrum of the discipline showcasing

contributions from more than 50 established and emerging scholars from Europe Africa Asia Australia and the Americas Prominent among these are contributions that discuss the epistemological frameworks of both the evolutionary and ideational approaches and the leading theories that ground interpretations Significantly the majority of chapters deliver substantive contributions that analyze specific examples of material culture from the oldest known stone tools to ceramic and rock art traditions of the recent millennium These examples include the gamut of methods and techniques including typology replication studies changes operational neuroarchaeology ethnographic comparison and the direct historical approach

Modelling Language Behaviour R. Narasimhan, 2013-03-12 This book studies language behaviour in the larger context of modelling or organismic behaviour more generally It starts out from the basic premise that what is characteristic of organismic behaviour is that an organism uses its behavioural acts to accomplish something in its interactions with the world in which it finds itself These two features that an organism has a behavioural repertoire and that it deploys specific behavioural acts from its repertoire in an intentional way define the agentive nature of an organism The study of organismic behaviour then must primarily concern itself with this agentive aspect of an organism and determine what structures and processes underlie these intentional organismic acts We should be able to say what primitive structures and what primitive processes put together in what ways can give rise to the kinds of behavioural acts an organism engages in Any explanation of behaviour that we formulate in terms of underlying structures and processes must be testable and must be consonant with the observed phenomenological aspects of such behaviour

The English Doctor Dr Richard Sloan, 2012 The book describes what goes on behind the scenes in undergraduate and postgraduate medical education scientific research and general medical practice in the United Kingdom It covers the years 1945 to 2012 and is an account of a unique medical journey The author was brought up by parents who were general practitioners in Yorkshire His upbringing was thoroughly middle class and his observations of his parents work and lifestyle resulted in his wanting to be a doctor Medical student life at University College London was hard work Several of his teachers were eminent and world famous Two of them were Professors J Z Young anatomy and Andrew Huxley Physiology and Nobel Prize winner Life long friendships were made with fellow students who worked together dissecting a human body Experiments were performed on one another The social life in the 1960s of a group of medical student friends is described Studying octopuses and squid in Naples Italy Was part of an extra degree course which was undertaken before starting hospital clinical studies These were at The London Hospital Whitechapel in the east end of London There was so much to learn before being allowed to practice as a doctor Clinical studies were undertaken at The London Hospital Whitechapel This is one of the oldest hospitals in the UK There is a huge learning curve which resulted in a doctor just about able to deal with patients A year of pre registration work started on the medical wards at Mile End Hospital followed by a period in the Receiving Room Accident and Emergency Department at The London Hospital The pre registration house jobs sometimes involved working 100 hours a week Nights in the accident emergency department were

manned by one pre registration house officer and a nurse There is a description of what is involved undertaking research to PhD level in physiology A new clinical thermometer was designed tested and eventually manufactured and sold by the instrument developer Muirhead Ltd So soon after being a student the wheels had turned and the author was teaching students himself There is an account of starting work as a General Practitioner in Cheltenham having not seen a single patient for the previous three years After that he worked for a short time in a London practice and then in Castleford West Yorkshire from 1978 to 2005 He and his wife build the practice up from a zero base to a thriving training practice housed in a large modern clinic Doing this was financially risky as well as stressful The development of postgraduate general practice education in Yorkshire in the last two decades of the twentieth century is described There are descriptions of becoming a trainer of prospective GPs and then organising and managing trainers The role of a GP tutor in the education of GPs was undertaken as a specific job Work on the assessment of the competence of trainee GPs was overseen in the Yorkshire Deanery based in Leeds West Yorkshire Work on the monitoring of the GP contract with the NHS and the GP appraisal scheme was undertaken by NHS Wakefield district a Primary Care Trust The author worked for both these bodies and what was involved in GP appraisal and inspection of practices target achievements is examined in detail Work with ill and underperforming general practitioners is described as well as mentoring GPs with problems and worries Very few patient problems and cases are included in this book which rather tells of the work that went on in the background It is that work that produces high quality doctors and also year on year improvement in patient care The last chapter involved informal interviews in 2012 with people studying and working in the same fields experienced over the years by the author and outlined above Readers are asked to judge whether the present day situation is an improvement on
