member Nicco Mele offers a fascinating sometimes frightening look at how our ability to stay connected constantly instantly and globally is dramatically changing our world Governments are being upended by individuals relying only on social media Major political parties are seeing their power eroded by grassroots forces through online fund raising Universities are scrambling to preserve their student populations in the face of less expensive more accessible online courses Print and broadcast news outlets are struggling to compete with citizen journalists and bloggers Our traditional institutions are being disrupted in revolutionary ways some for the better But as Nicco Mele argues the benefits of new technology come with unintended consequences In *The End of Big* Mele examines How fringe political forces enter the mainstream and gain traction using everyday technology with the enormous potential to undermine central power What happens when investigative journalism is replaced by ad hoc bloggers mobile video and instantaneous tweets and whether they challenge or simply enable power Why Web based micro businesses are outcompeting major corporations and what innovations will alter the way we work own things and pay for goods and services The collapse of traditional party politics and the rise of a new kind of democracy one which could produce dynamic and effective leaders or demagogues How citizen initiatives can replace local and state government functions such as safety regulations tax collection and garbage pickup and do so cheaper faster and better Mele argues that unless we exercise caution in our use of these new technologies we risk a dark and wildly unstable future one in which our freedoms and basic human values could be destroyed rather than enhanced Both hopeful and alarming *The End of Big* is a thought provoking passionately argued book that offers genuine insight into the ways we are using technology and how it is radically changing our world in ways we are only now beginning to understand
