Microelectronics Education Ton J. Mouthaan, Cora Salm, 2012-12-06 Dear participant in the second European Workshop on Microelectronics Education It is a pleasure to present you the Proceedings of the Second European Workshop on Microelectronics Education and to welcome you at the Workshop The Organising Committee is very pleased that it has found several key persons with highly appreciated levels of knowledge and expertise willing to present Invited Contributions to this Workshop We have striven for an interesting spread over important areas like the expected demands for educated engineers in the wide field of Microelectronics and Microsystems in European industry and beyond and innovations in method and focus of our educational programmes This is the second European Workshop in this area the first one was held in Grenoble in France in the spring of 1996 It was the initiative of Georges Kamarinos Nadine Guillemot and Bernard Courtois to organise this Workshop because they felt that Microelectronics was at a turning point to become the core of the largest industry in the world and that this warranted a serious re consideration of our educational imperatives It is now two years since and their feeling has become reality nobody doubts that by the year 2000 the microelectronics industry will be the

largest industrial sector It is also obvious that because of that and because of the predicted shortfall of educated engineers we must continuously reconsider the quality of our educational approach

Network Simulation Experiments Manual Emad Aboelela, 2008 Networking technologies and concepts are often difficult to explain even through careful description and well thought out examples One method for making this information stick is to create an environment where networking professionals and students can visualize how networks work by utilizing a software tool that simulates the functions within a network The tool provides a virtual environment for an assortment of desirable features such as modeling a network based on specified criteria and predicting its performance The Network Simulation Experiments Manual takes this instructional tool a step further and provides detailed experiments on core networking topologies for use in this simulation environment Various scenarios are presented within each topology Review questions suggested readings a lab report and exercises accompanying each assignment The manual also comes with directions for downloading the free and easy to install OPNET IT Guru Academic Edition software This software provides a virtual environment for modeling analyzing and predicting the performance of IT infrastructures including applications servers and networking technologies Prepared by Professor Emad Aboelela of the Taibah University Saudi Arabia the experiments in the manual are closely tied to the organization of Computer Networks A Systems Approach Fifth Edition and when used together serve as a complete tool for understanding how and why computer networks function as they do Updated and expanded by an instructor who has used OPNET simulation tools in his classroom for numerous demonstrations and real world scenarios Software download based on an award winning product made by OPNET Technologies Inc whose software is used by thousands of commercial and government organizations worldwide and by over 500 universities Useful experimentation for professionals in the workplace who are interested in learning and demonstrating the capability of evaluating different commercial networking products i e Cisco routers Covers the core networking topologies and includes assignments on Switched LANs Network Design CSMA RIP TCP Queuing Disciplines Web Caching etc
