Why Quark Rhymes with Pork N. David Mermin, 2016-01-13 A collection of offbeat entertaining and primarily nontechnical essays on physics and those who practice it from eminent theoretical physicist N David Mermin Bringing together for the first time all thirty of his columns published in Physics Today's Reference Frame series from 1988 to 2009 with updating commentary this humorous and unusual volume includes thirteen other essays many of them previously unpublished Mermin's lively and penetrating writing illuminates a broad range of topics from the implications of bad spelling in a major science journal to the crises of science libraries and scientific periodicals the folly of scientific prizes and honors the agony of getting funding and how to pronounce quark His witty observations and insightful anecdotes gleaned from a lifetime in science will entertain physicists at all levels as well as anyone else interested in science or scientists at the turn of the twenty first century

Lost in Math Sabine Hossenfelder, 2018-06-12 In this provocative book New York Times a contrarian physicist argues that her field's modern obsession with beauty has given us wonderful math but bad science Whether pondering black holes or predicting discoveries at CERN physicists believe the best theories are beautiful natural and elegant and this standard separates popular theories from disposable ones This is why Sabine Hossenfelder argues we have not seen a major breakthrough in the foundations of physics for more than four decades The belief in beauty has become so dogmatic that it now conflicts with scientific objectivity observation has been unable to confirm mindboggling theories like supersymmetry or grand unification invented by physicists based on aesthetic criteria Worse these too good to not be true theories are actually untestable and they have left the field in a cul de sac To escape physicists must rethink their methods Only by embracing reality as it is can science discover the truth
