

# Analysis of Dyadic Data

In each of these cases, the issues of stability, consistency, and correlation between related measurements are interesting phenomena. However, none of them can be addressed easily by standard methods developed for the study of individuals. These cases can be dealt through interpersonal processes or dyadic data analysis, that permits the assessment and testing of dependency. The analysis of interdependent data presents special issues because the covariance across individuals needs to be addressed in the analyses rather than fixing data for independence.

In the analysis of dyadic data there are many issues that need to be addressed in the analysis, such as whether dyad members are exchangeable or distinguishable.
