and Outer Space Systems** Elena Cirkovic,2025-03-17 This book offers a paradigm shifting exploration of lawmaking for the  
complex interactions between Earth systems and outer space Drawing on complex systems science posthuman approaches  
and plural ontologies the author proposes a reimagining of law and governance for the cosmic age Through the cosmolegal  
perspective this study embraces the inherent uncertainties and complexities of Earth space interactions From Arctic methane  
craters to orbital debris the book weaves together scientific insights landscape architecture legal theory and doctrine to  
address pressing environmental challenges that span Earth and beyond While legal scholarship has increasingly engaged  
with Earth System Science it typically treats outer space as distinct from Earth s environment However Earth s existence and  
complex systems are fundamentally intertwined with and emerge from outer space This book argues that a legal framework  
for Earth s systems needs to include outer space At its core the book advocates for a complexification of law calling for  
greater epistemic humility in legal thought and practice Thoughtful and provocative this work invites readers to reconsider  
fundamental assumptions about law nature and agency beyond the human in an era of planetary change The cosmolegal  
approach aims to shift legal imagination and understanding positioning human law as just one of many actors within the  
cosmos This original work will appeal to scholars of legal theory and environmental law as well as those interested in
