Book of Shadows Dayanara Blue Star, 2015-03-22 For hundreds of years pagans and witches have used spell casting as a means of changing their lives and expressing their spirituality Learning to cast spells is an artful meditation a valuable way to get in touch with your true desires gain personal insight and magnetize the wealth of positivity that flows through the Earth and the spiritual plane Your altar and spell casting tools provide a physical medium for the energy and intention manifested from the deepest part of your soul Intention affects all of your actions on both conscious and subconscious levels You are a link in the chain of energy that flows within everything that exists Everyone has the ability to channel this energy and use it in pursuit of their goals and desires While this energy is extremely powerful you need not be an experienced mage to conjure positivity through spiritual practice You can cast effective spells using even the simplest tools because the power comes from within yourself Spell casting isn t the same as making a wish it is planting the seeds of intention so that your desires may grow and flourish Pagan tradition has long recognized that intuition psychic energy and motivation are elements of the mind that can be combined harmoniously and channeled together to achieve various goals In mainstream circles many people look toward the power of affirmations to improve their life While the language is different it is quite similar to the methods Wiccans and other pagans have been using since the ancient times By using spells you re creating a dialogue with the flow of energy from all realms of the Universe You can think of the results as a response to your communication and these results may surprise

you Cast your spells with an open heart and an honest mind and be as honest with yourself as possible The spells listed in this book can be altered to suit your specific needs and desires and it is always best to go with your intuition go with what feels most true to you Spells do not work if you yourself do not believe what you re saying or doing so make it meaningful It is my pleasure to share my knowledge I ve obtained through years of studying and practicing the craft My spiritual journey is always evolving and I cherish the ability to help others along with their journeys as well The more you practice the more in tune you will be with your own unique connection with the cosmic flow of energy that is the very pulse of Life Use your creativity keep an open mind and the path toward whatever you are seeking will unfold before you with new illuminations along the way Love and light to all Dayanara Blue Star **Dream Interpretation** Dayanara Blue Star,2015-03-10

Scientifically dreams are defined as brain activity while a person is sleeping The types of dreams that a person has can be traced to what part of the sleep cycle they were in during the dream Dreams are directly connected to stored memories that are stimulated while we sleep Scientists have a variety of hypotheses on why we dream One of the hypotheses on why we dream is that it gives the cortex a chance to rest By unplugging the cortex your brain is no longer processing information Instead it dives into your memory banks and replays old memories often jumbling them together in ways that do not make logical sense According to this hypothesis dreams do not have any meaning and our attempts to create some deeper truth out of scrambled memories is a human fallacy A second hypothesis has arisen with the discovery that most mammals dream Proponents of this hypothesis argue that dreams must serve a purpose if they are such a widespread phenomenon The strongest theory thus far is the threat simulation theory The essence of this theory is that dreams are a way for the brain to put itself in different scenarios and then think of a way out It s essentially your brain s way of training itself to respond to threats Like the first hypothesis this one ascribes no deeper hidden meaning to the actual contents of the dream An opposing hypothesis puts forth the idea that dreams are a way to encode memories The amygdala is the part of our brain that is responsible for the formation of memories especially very emotional ones The amygdala is also very active during dreams Interpreting dreams under this hypothesis is a way to analyze the memories that are too painful for us to face while fully awake People who support this hypothesis believe dreams to be very helpful in facing past trauma They have found by using the dream to tease out some event buried within their subconscious they have been able to face their past and begin the healing process Those who oppose this hypothesis fear that it may be harmful to those who subscribe to it Their concern is that people become convinced that there is a traumatic event buried in their past when no such event ever truly occurred By learning more about dreams and dream interpretation you will come to recognize the different types of dreams and be able to understand what is causing them without ascribing the wrong meaning to them Take advantage of this great opportunity to learn to interpret your dreams and use these messages to learn more about your life
