No-Waste Composting

Michelle Balz,2021-03-09 In No Waste Composting you ll discover the hows and whys of composting and find over a dozen practical step by step plans for building both indoor and outdoor composting systems that require a minimal amount of space I don t have enough space to compost I don t know what s safe to compost and what isn t I live in the city so I don t think I can compost Indoor composting systems are smelly I don t have a

garden so I don't need to compost. If any of these is your excuse for not composting, then this is the book for you. Small space composting has never been easier, more efficient, and more eco-friendly. Composting keeps millions of tons of waste out of landfills and creates carbon sequestering, nutrient dense compost that can be used to help fuel plant growth including houseplants and build soil health. Build a DIY worm composting system for a cupboard or garage. Craft a layered under the sink composting system from terra cotta pots. Construct a simple outdoor compost bin from repurposed wooden pallets. Use upcycled wire fencing to build a mobile composting system on the driveway. Learn how to compost larger sticks and branches to build new food and flower gardens. Upcycle a plastic bucket to make an indoor compost fermenting system. Plus you'll find plans to keep cat and dog waste out of the landfill by using a groundbreaking and safe DIY composting system. And if you don't garden, author and composting professional Michelle Balz offers plenty of other ways you can utilize the wonderful crumbly compost you create. Whether you're just starting your no waste journey or you're a seasoned recycling and repurposing pro, No Waste Composting is an invaluable tool to have at your side. This book is part of the Cool Springs Press No Waste Gardening series which also includes No Waste Kitchen Gardening and No Waste Organic Gardening.

Healing Appalachia Al Fritsch, Paul Gallimore, 2007-05-11. *Healing Appalachia* is a practical guide for environmentally conscious residents of Appalachia and beyond. It is also the first book to apply appropriate technology or the most basic technology that can effectively achieve the desired result to this specific region. Authors Al Fritsch and Paul Gallimore have performed over 200 environmental resource assessments in thirty-three states. They bring this knowledge to bear as they examine thirty low-cost, people-friendly and environmentally benign appropriate technologies that can be put to work today in Appalachia. They discuss such issues as renewable energy and energy conservation, food preservation and gardening, forest management, land use, transportation, water conservation, proper

waste disposal and wildlife protection They pay close attention to the practicality of each technique according to affordability ease of use and ecological soundness Their subjects range from solar home heating to greenhouses from aquaculture to compost toilets from organic gardening to wildlife restoration and enhancement and from solar cars to microhydropower facilities Their discussions of each topic benefit from the knowledge gained from thirty years of practical experience at environmental demonstration centers and public interest and educational organizations Each section of the book includes details on construction and maintenance as well as resources for locating further information making this an essential volume for everyone who cares about the future of Appalachia
