Early Warming Crisis And Response In The Climate Changed North:

Early Warming Nancy Lord, 2011-01-10 In Shishmaref Alaska new seawalls are constructed while residents navigate the many practical and bureaucratic obstacles to moving their entire island village to higher ground Farther south inland hunters and fishermen set out to grow more of their own food and to support the reintroduction of wood bison an ancient species well suited to expected habitat changes First Nations people in Canada team with conservationists to protect land for both local use and environmental resilience In Early Warming Alaskan Writer Laureate Nancy Lord takes a cutting edge look at how communities in the North where global warming is amplified and climate change effects are most immediate are responding with desperation and creativity This beautifully written and measured narrative takes us deep into regions where the indigenous people who face life threatening change also demonstrate impressive conservation ethics and adaptive capacities Underpinned by a long acquaintance with the North and backed with scientific and political sophistication Lord s vivid account brings the challenges ahead for us all into ice water clarity

Cli-Fi and Class Debra J. Rosenthal, Jason de Lara Molesky, 2023-10-09 Since its emergence in the late twentieth century climate fiction or cli fi has concerned itself as much with economic injustice and popular revolt as with rising seas and soaring temperatures Indeed with its insistent focus on redressing social disparities cli fi might reasonably be classified as a form of protest literature As environmental crises escalate and inequality intensifies literary writers and scholars alike have increasingly scrutinized the dual exploitations of the earth s ecosystems and the socioeconomically disadvantaged Cli Fi and Class focuses on the representation of class dynamics in climate change narratives With fifteen essays on the intersection of the economic and the ecological addressing works ranging from the novels of Joseph Conrad Cormac McCarthy and Octavia Butler to the film Black Panther and the Broadway musical Hadestown this collection unpacks the complex ways economic exploitation impacts planetary well being and the ways climatic change shapes those inequities in turn

Arctic Voices Subhankar Banerjee, 2012-07-03 One of the great strengths of Arctic Voices is that it shows how Alaska and the Arctic are tied to the places where most of us live In this impassioned book Banerjee shows a situation so serious that it has created a movement where voices of resistance are gathering are getting louder and louder May his heartfelt efforts magnify them The climate changes that are coming have hit soon and hard in the Arctic and their consequences may be starkest there Ian Frazier The New York Review of Books A pristine environment of ecological richness and biodiversity Home to generations of indigenous people for thousands of years The location of vast quantities of oil natural gas and coal Largely uninhabited and long at the margins of global affairs in the last decade Arctic Alaska has quickly become the most contested land in recent US history World renowned photographer writer and activist Subhankar Banerjee brings together first person narratives from more than thirty prominent activists writers and researchers who address issues of climate change resource war and human rights with stunning urgency and groundbreaking research From Gwich in activist Sarah James s impassioned appeal We Are the Ones Who Have Everything

Critical Norths Sarah Jaquette Ray, Kevin Maier, 2017-05-15 For millennia the North has held a powerful sway in Western culture Long seen through contradictions empty of life yet full of promise populated by indigenous communities yet ripe for conquest pristine yet marked by a long human history it has moved to the foreground of contemporary life as the most dramatic stage for the reality of climate change This book brings together scholars from a range of disciplines to ask key questions about the North and how we've conceived it and how conceiving of it in those terms has caused us to fail the region's human and nonhuman life Engaging questions of space place indigeneity identity nature the environment justice narrative history and more it offers a crucial starting point for an essential rethinking of both the idea and the reality of the North Pitfalls of Shoreline Stabilization J. Andrew G. Cooper, Orrin H. Pilkey, 2012-06-05 At the coast all is not what it seems Decades of beachfront development have seen a variety of efforts to stabilize the shoreline to protect ill-placed beachfront property both from shoreline erosion and from storm damage Both of these problems become increasingly critical in a time of rising sea level Many natural beaches are backed by sea walls while others have been transformed by whole series of groynes offshore breakwaters and a plethora of other schemes Many recreational beaches are actually artificial replicas of the real thing emplaced to protect badly placed infrastructure and maintained only through ongoing costly beach nourishment However all of these attempts to stabilize the shoreline are far from benign Degradation and even complete loss

of the all important recreational beach sometimes results from seawall emplacement Increasingly the choice of shoreline stabilization approach will depend upon plans for future response to rising seas which in many cases may involve retreat from the shoreline rather than holding the line This book explores through a series of case studies from around the globe the pitfalls of shoreline stabilization and provides a ready reference for those with an interest in shoreline management It is particularly timely in a time of global change Ethics of Alaska Travel Writing since 1959 Benjamin Ferguson,2025-08-28 This book digs into environmental themes in Alaska travel writing since U S statehood in 1959 drawing on the works of six authors including Barry Lopez Jonathan Raban Tom Lowenstein and others Each work though disparate in style advocates for the empowerment of the Alaska Native people by connecting not only with diverse perspectives but with the lived realities in the geographical spaces that have formed them In analyzing how these authors have succeeded in depicting the realities of alterities and where they have perhaps fallen short by more recent standards we may begin to carve out a system of ethics This is important as fresh waves of travel writers search for their own place in the environmental conversations surrounding the ever evolving 21st century Arctic and its place on the front lines of a changing climate *American Health Crisis* Martin Halliwell,2021-05-18 A history of U S public health emergencies and how we can turn the tide Despite enormous advances in medical science and public health education over the last century access to health care remains a dominant issue in American life U S health care is often hailed as the best in the world yet the public health emergencies of today often echo the public health emergencies of yesterday consider the Great Influenza Pandemic of 1918 19 and COVID 19 the displacement of the Dust Bowl and the havoc of Hurricane Maria the Reagan administration s antipathy toward the AIDS epidemic and the lack of accountability during the water crisis in Flint Michigan Spanning the period from the presidency of Woodrow Wilson to that of Donald Trump *American Health Crisis* illuminates how despite the elevation of health care as a human right throughout the world vulnerable communities in the United States continue to be victimized by structural inequalities across disparate geographies income levels and ethnic groups Martin Halliwell views contemporary public health crises through the lens of historical and cultural revisionings suturing individual events together into a narrative of calamity that has brought us to our current crisis in health politics *American Health Crisis* considers the future of public health in the United States and presenting a reinvigorated concept of health citizenship argues that now is the moment to act for lasting change Abbey in America John A. Murray,2015-05-15 More than twenty five years after his death iconic writer and nature activist Edward Abbey 1929 1989 remains an influential presence in the American environmental movement Abbey s best known works continue to be widely read and inspire discourse on the key issues facing contemporary American society particularly with respect to urbanization and technology *Abbey in America* published forty years after Abbey s popular novel *The Monkey Wrench Gang* features an all star list of contributors including journalists authors scholars and two of Abbey s best friends as they explore Abbey s ideas and legacy through their unique literary personal and scholarly perspectives

Native Women and Land Stephanie J. Fitzgerald, 2015-03-15 Dispossession and removal are major subjects in understanding the relationship of American Indians to their ancestral lands This book is the first treatment of these complex topics to focus on women writers The author's emphasis on environmental issues makes her book as important to ecocritics as to students of literary criticism women's studies and Native American studies from dust jacket

Storm Warning Robert William Sandford, 2015 Human beings and industrial based society are changing the composition of our planet's atmosphere and causing it to warm at an unnatural and oftentimes astonishing rate Much of that warmth is being absorbed by water which is causing an acceleration in the rate and manner in which water moves through the global hydrological cycle A warmer atmosphere carries more water vapor which means as temperatures continue to rise storms will be more intense last longer and cause more damage to our towns cities and vital infrastructure On the other side of the hydro climate coin we can also expect deeper more persistent and damaging droughts throughout the world resulting in dramatic losses difficult economic outcomes and fundamental alterations to landscape This highly considered accessible and readable book explains how changes in the water cycle have already begun to affect how we think about and value water security and climate stability and what we can do to ensure a sustainable future for our children and grandchildren

The challenge of sustainability Atkinson, Hugh, Wade, Ros, 2014-12-03 This timely and accessible book explores the links between politics learning and sustainability Its central focus is the future of people and the planet itself The challenges that we face in combatting climate change and building a more sustainable world are complex and the book argues that if we are to successfully meet these challenges we need a fundamental change in the way we do politics and economics embedding a lifelong commitment to sustainability in all learning We have no option but to make things work for the better After all planet earth is the only home we have The book will be important reading for academics and students in a variety of related subjects including politics public policy education sustainable development geography media international relations and development studies It will also be a valuable resource for NGOs and policy makers

Climate Change in the Middle East and North Africa William R. Thompson, Leila Zakhirova, 2021-07-04 Environmental factors in the Middle East and North Africa MENA have played a crucial role in the historical and social development of the region The book delves into a broad set of historical literature from the past 15 000 years that neglected to consider environmental factors to their full effect

Beyond the broad historic analysis the chapters derive conclusions for today's debate on whether climate change leads to more social conflict and violence. Introducing a theoretical framework focused on adaptive cycling, this book probes and refines the role of climate in ancient and modern political economic systems in the MENA region. It also underscores just how bad the 21st century environment may become thanks to global warming. While the MENA region may not survive the latest onslaught of deteriorating climate, there is also some interest in how a region that once led the world in introducing all sorts of innovations thousands of years ago has evolved into a contemporary setting characterized by traditional conservatism, poverty, and incessant strife. Emphasizing regional dynamics, the book's central question deals with the role of climate change in the rise and decline of the MENA region. The book will be a key resource to students and readers interested in global warming, including academics and policymakers.

Climate Changes in the Holocene: Eustathios Chiotis, 2018-11-15. This book highlights climate as a complex physical, chemical, biological, and geological system in perpetual change under astronomical, predominantly solar control. It has been shaped to some degree through the past glaciation cycles repeated in the last three million years. The Holocene, the current interglacial epoch which started ca. 11,700 years ago, marks the transition from the Stone Age to the unprecedented cultural evolution of our civilization. Significant climate changes have been recorded in natural archives during the Holocene, including the rapid waning of ice sheets, millennial shifting of the monsoonal fringe in the northern hemisphere, and abrupt centennial events. A typical case of severe environmental change is the greening of Sahara in the Early Holocene and the gradual desertification again since the fifth millennium before present. **Climate Changes in the Holocene: Impact, Adaptation, and Resilience** investigates the impact of natural climate changes on humans and civilization through case studies from various places, periods, and climates. Earth and human society are approached as a complex system, thereby emphasizing the necessity to improve adaptive capacity in view of the anthropogenic global warming and ecosystem degradation. **Features:** Written by distinguished experts, the book presents the fundamentals of the climate system, the unparalleled progress achieved in the last decade in the fields of intensified research for improved understanding of the carbon cycle, climate components, and their interaction. Presents the application of paleoclimatology and modeling in climate reconstruction. Examines the new era of satellite-based climate monitoring and the prospects of reduced carbon dioxide emissions.

Assessments of Regional and Global Environmental Risks Alexander E. Farrell, Jill Professor Jäger, 2010-09-30. As environmental challenges grow larger in scale and implications, it is increasingly important to apply the best scientific knowledge in the decisionmaking process. Editors Farrell and Jäger present environmental assessments as the bridge between the expert knowledge of scientists and engineers on the one hand and decisionmakers on the other. When done well, assessments have a positive impact on public policy, the strategic decisions of private firms, and ultimately the quality of life for many people. This book is the result of an international interdisciplinary research project to analyze past environmental assessments and understand how their design influenced their effectiveness.

in bringing scientific evidence and insight into the decisionmaking process The case studies in the book feature a wide range of regional and global risks including ozone depletion transboundary air pollution and climate change Assessments of Regional and Global Environmental Risks offers several important contributions It provides a clear account of the choices faced in the design of environmental assessments and a clear description of the lessons learned from past assessments It illustrates why assessments are social processes not simply reports And while they identify no universal one size fits all design the authors find that to be effective environmental assessments must be viewed by those who produce and use them as being salient credible in their scientific support and legitimate or fair in design and execution **The Wiley Blackwell**

Companion to Religion and Ecology John Hart, 2017-03-24 In the face of the current environmental crisis which clearly has moral and spiritual dimensions members of all the world's faiths have come to recognize the critical importance of religion's relationship to ecology The Wiley Blackwell Companion to Religion and Ecology offers a comprehensive overview of the history and the latest developments in religious engagement with environmental issues throughout the world Newly commissioned essays from noted scholars of diverse faiths and scientific traditions present the most cutting edge thinking on religion's relationship to the environment Initial readings explore the ways traditional concepts of nature in Christianity Judaism Islam Buddhism and other religious traditions have been shaped by the environmental crisis Readings then address the changing nature of theology and religious thought in response to the challenges of protecting the environment Various conceptual issues and themes that transcend individual traditions climate change bio ethics social justice ecofeminism and more are then analyzed before a final section examines some of the immediate challenges we face in caring for the Earth while looking to the future of religious environmentalism Timely and thought provoking Companion to Religion and Ecology offers illuminating insights into the role of religion in the ongoing struggle to secure the future well being of our natural world With a foreword by Ecumenical Patriarch Bartholomew I and an Afterword by John Cobb **The Impact of Climate**

Change on Our Life Abdelnaser Omran, Odile Schwarz-Herion, 2018-02-23 This book introduces the highly topical issue from many different angles sensitizing readers to the various challenges to human life posed by climate change identifying possible intentional and inadvertent anthropogenic factors and consequences and seeking socially and environmentally viable solutions The book begins by examining the impact of the climate change discussion on science politics economy and culture from its historical origin in the first Club of Rome Report and its inclusion in the UN's SDGs to the Paris Agreement and beyond Comprising 12 chapters it analyses the factors which caused the catastrophic 2014 Kelantan flood in Malaysia focusing on the Kuala Krai district and discusses mud architecture in Wadi Hadramout Yemen and mitigating the expected effects of climate change on this unique architecture and cultural heritage It also examines the economic costs of climate change on health and the increased burden on individual expenditures and national health systems The role of climate change in the water energy nexus and efforts to increase efficiency in energy and water end use to increase Queensland's

agricultural sector's resilience in Australia is addressed as is water security and climate change issues in developing countries and the potential of partnership procurement strategies for managing sustainable urban water supply in Nigerian cities. It also includes a chapter offering a new approach to waste management exploring to what extent waste can complicate our daily actions and influence environmental decay and recommending that renewable materials be sorted and separated from other types of materials to avoid cross contamination to increase the value of the materials and to ease the process of manufacturing. Subsequent chapters identify factors sustaining the municipal solid waste management and practices in Ajdabiya city in Libya and look at accounting disclosure remedies by exploring areas in which sustainability reporting could expand beyond corporate environmental reporting to additional disclosures curbing recklessness in pursuing merely economic goals. The book shows from the perspective of agriculture how human activities can increase the negative impacts of climate change on lifestyle in Malaysia suggesting alternative lifestyles and encouraging international cooperative efforts. The last chapters evaluate the impacts of various environmental factors on the local tourism sector in Pakistan and discuss strategies to tackle climate change focusing on the opportunities and risks of climate engineering. Since these risks encompass inadvertent negative effects and targeted abuse for covert weather warfare and terrorism that violate the UN's ENMOD convention, the author recommends viable alternatives to deal with climate change. **EPA Journal**, 1989

Canadian Society in the Twenty-First Century, Fourth Edition Trevor W. Harrison, John W. Friesen, 2021-03-03

Confederation may have established Canada's nationhood in 1867 but the relationships framing Canada's modern existence go back much further. Employing a unique socio-historical perspective, *Canadian Society in the Twenty-First Century* examines three formative relationships that have shaped the country: Canada and Quebec, Canada and the United States, and Canada and Indigenous nations. Now in its fourth edition, this engaging text offers students an overview of Canadian society through a series of connections rather than a collection of statistics. Trevor W. Harrison and John W. Friesen weave together complex aspects of the nation's economic, political, and socio-cultural development. They guide readers to use this interdisciplinary framework to consider some of the tough questions that Canada is likely to face in adjusting to demands and challenges in the next few decades. Reflecting the most current scholarship in the field, this revised edition features new discussions on issues such as the current crisis of neo-liberal globalization, Canada's petroleum industry, global warming, the Wet suwet en dispute in 2020, and the COVID-19 pandemic. Exploring the unique character of Canada today, this text is a vibrant resource for sociology courses on Canadian society as well as courses in Canadian studies and Canadian history.
