The school year of 2020 was unlike any other. Globally, the outbreak of COVID 19 impacted learners and educators in all levels. Many learners were forced to rapidly transit from face to face to online learning while educators were required to hastily convert in person to online delivery mode. What challenges did the educators and learners face and what were the possible solutions? How can technology as a tool be used to enhance teaching and maximize student learning when an emergency occurs? This book addresses these two questions. Subsequent chapters represent a variety of research

approaches and perspectives from learners educators and parents of learners but all share a common focus on challenges faced by educators and learners as well as opportunities to use technology as a tool to maximize student learning during a worldwide pandemic Technology s Challenges and Solutions in K 16 Education during a Worldwide Pandemic will be a key resource for educators academics researchers and students of Education Instructional Design and Technology Educational Leadership and Policy Educational Research Educational Technology Research Methods and Sociology STEM Education and Curriculum and Instruction The chapters included in this book were originally published as a special issue of Computers in the Schools
