**Donor Coordination of Economic Assistance to Eastern Europe** Gerrit Stratmann,2000 A major restriction to Western aid efforts has been a lack of coordination This book delves into the determinants of successful cooperation between bi and multilateral donor agencies at the example of Western aid to Eastern Europe in the period from 1990 to 1996 In raising the assumption that networking between international organizations cannot be stimulated by appealing to norm oriented behavior but is contingent upon the existence of common interests the idealist view of international relations is seriously challenged Comparing different assistance sectors energy telecoms mass privatization agriculture statistics central banking environment and education it is shown that donor coordination is a form of collective

action initiated by donors in response to sectoral market failure which is perceived as significant because it threatens the non attainment of basic goals or inflicts own projects with high costs or risks      **Journal** ,1905      **Report of the Trustees of the State Library, as to the Donations Recently Made to the Library Through M.
